

Immense gratitude goes out to Sabrina Dawn Davis Wallace.

**So you think your body is a *Wonderland*?**  
**They define the human body as a NODE, as a NETWORK since 2012**  
**and it sends and receives signals.**  
**You're a walking, talking NODE on the WBAN (wide body area network.)**  
**Computer data is ROUTED through your body.**  
***You're already being used as a hard drive for storage.***

**What is the goal?**

Wireless tissue engineering for total piezoelectric CONTROL down to the bone marrow.  
It's full domination of every cell in your body.

...and you were worried about them reading your thoughts as to what you purchase. They finished that in the 50's. --Sabrina

Sabrina's files and videos are archived here with the password: ThankYouSabrina!!

Who is Sabrina Dawn Davis Wallace?

<https://odysee.com/@psinergy:f/Cerebral-Sabrina:-6>

**For decades, YOU have been monitored wirelessly via 802.15.4 biosensors from at least 2 radio frequency (RF) sinks near your heart (thoracic duct of your lymphatic system) & bladder cisterna chyli of your lymphatic system) which collect signals from 5 star-shaped nodes mapped over your circulatory system & acupuncture meridians. Your digital twin is uploaded to the cloud, & your neurons are watched in real-time. [The biosensors are made out of your DNA inside of you. Your body IS the [wireless sensor] network. -- Sabrina] These biosensors are made with YOUR tissues (amino acids, peptides, etc) attached to nanotechnology (transducers) which use your red blood cells & minerals to carry the electrical signal to RF sinks. The RF sinks can act as a conduit to uncouple cells, disassociate fields, collocate neurons, mesh with the BANs, etc**

+++++

**What is 6G?** Software defined networking through the human body. We're going to get into the memory; well it's kind of funny it stores the memory in the air molecules—that's tensor sequences and the most hardcore encryption that we flipped over was "**quantum**."

Source: Afternoon chattin w/ the psinergists (Sabrina Wallace)

<https://odysee.com/@psinergy:f/trim.5A0A63C5-24A0-4F40-9E76-240C31A638F6:3> - Oct 21, 2023

#### **Tensor Sequencing – Trapped-Ion Quantum Computer**

The System Model **H2** (Honeywell) provides the tools for large-scale experimentation. Tensor networks provide low-dimensional representations of high-dimensional data and using them to construct machine learning models for interpretability.

Based on trapped-ion technology and other applications, a trapped-ion quantum computer **manipulates suspended ions in free space using electromagnetic fields to perform quantum operations** while individual ions serve as qubits.

Quantinuum scientists have **simulated a hydrogen molecule (H2)** by implementing and **detecting early fault tolerant algorithms** on a quantum processor using logical qubits for future large-scale quantum computing.

+++++

**How do they get the biosensors in me? [see below]**

+++++

**This is warfare. They have weaponized the biofield and chakras [and/or aura field].**

<https://plasmaenergysolution.com/?p=14059#sdfootnote1sym>

plasmaenergysolution.com, has free reports, scroll down to the final report, enter your first name and email address to open the report and see the entire presentation with screen shots.

<https://plasmaenergysolution.com/?p=14059>

Our biofield is a DNA generated body part [that can be manipulated/targeted in so many ways.

The Following are excerpts from a transcription from one of Sabrina Wallace (Davis)'s videos:

<https://odysee.com/@Psinergy:8>

**Sabrina:** so, they send the 'sequence through the 5G'.

You are in a paired, native sequence ('natively paired sequencing.')

If it is an industrial, scientist or military band for a satellite

What radio frequency international standard for electronics and engineering was used to send a signal through the wireless into your phone into your biosensors that are in your body?

#### **802.15.4**

It is very engineered, electronic warfare, here to stay and pay for play (for anyone and everyone).

#### **SENSORS**

Open Systems Architecture (SOSA)

Modular Open Systems Approach (MOSA)

**Everyone else is saying, *Bluetooth?***

We use this word on the Psinergist channel—it's a sequence grid issue. I said, *you are feeding your people to something bigger than you. They will leave you alone, but anybody who is connected to your community ... they are dead.*

**You told them it was electro-magnetic field theory. You did not tell them it was 802.15.4. You told them it was a demon field...you told them somebody else was going to come and save them. You didn't tell them our government is who uses 802.15.4.**

**You told them their digital ID works differently. You did not tell them their digital ID works with 802.15.4 with an MQ9 reaper drone on Pentagon Statement 3000.09 as per the college textbook of doom and the Pentagon:**

***this is the new digital ID:***

This is a 6G LOPAN (PAN = personal area network). A 6G PAN is the same radio frequency IEEE and that is 802.15.6. 6G LOPAN is 802.15.6. The biosensors themselves are 802.15.4. The wireless sensor networks they run on acronym is WSN and the technical writing is 802.15.5.

**They have been running your body with data, commercially selling your body, routing data, since 2005.**

Feeder grids are called sequences.

**It's right here in the combinatorial libraries for DNA encoded solid phase synthesis and what does it give us? The ability to make sure the Obama death panels and their carrier waves match the smart devices in your house they watch 24/7.**

**They make changes with wireless tissue engineering to do to your bloodstream whatever they want in real time.**

**They have a body area network and those spiked proteins live on this. They live in a data center and they come and go into you.**

+++++++We have an IEEE of photonics as well.+++++++

**It's piezo-electric harvesting out of your bones. It transmits inside packets in the wireless right out of your bone marrow right out of your red blood cells, and right into joules that are then powering the 6G LOPAN in the green energy.** They use the sequence with the 5G.

It is pin-pointed by sequences. Those are feeder grids.

They have eyes on everyone who has not been injected, and who is still talking about not being injected.

**Because somebody has a data center with you in it. Sorry. But if you didn't know that covid had its own body area networks (BAN) and if you don't understand that since the 1990s a BAN is your bones you are dead. They lied and there is no software that is going to get you out of this. It is photonic. It is instant. It is something I used to call energy work.**

**It is energy—it is your prana, your chi.**

It is not a radio frequency and it is not a beam form. As far as disconnecting you from your somatoform,<sup>2</sup> they disconnected you from the gene that actually allows you to feel anything outside of you, consciousness-wise.

## **CO-BAN**

The flatworms and all that—once they separate out all your cell structure, they don't need you to be in one piece.

**It's wireless tissue engineering.** Project Salus was around a long time ago.

...used us as your own personal hard drive

[vaxed] You are hybridized and now you are just a system, you are just a machine and you report to my biofield like graphene because you are. You are more graphene than human. That is syn-bio and it eventually unbalances.

the more people that know that energy work is very real, the more people that know how to shield, block, shock and shunt

I am anticipatory to see what the military is going to roll out first, whether it's going to be Klip Klop or the white suit derivatives.

+++++++

<https://odysee.com/@psinergy:f/trim.D5E8F851-4FF8-483C-B72A-7590D29617E2:4>

Sabrina: The vaccines were not needed for tracking. They were needed for faster conductivity between the pre-existing, thus easily accessible to bluetooth software, body area networks aka you which is how overnight the digi id and the iot is all over the place. The vaccines are about transhumanism, not what you buy or sell.

The vaccines were always about watching your dna from far away aka through the wireless which predates the 50s with arpa darpa.

### **I suspected them of using our brain magnetite for internet - wireless connection**

Sabrina: the biosensors needed quantum programming upgrades with the cyber nano and neuromorphic intel 6 and 7g chipsets [readout chips in vivo] .. more easily accessible. Quantum is about staying inside the same cube .. 4 ft by 4ft, same geo spatial locale - now the focus is to make a change inside the body at the photonic level. Quantum has been operational but given they never explained the body was wireless, good luck trying to explain quantum.

+++++

<https://odysee.com/@psinergy:f/trim.F4094958-F4D6-4E8F-ACA3-E8498130E542:7>

11:10 talk to me about the routing through human bodies because that's how it works. It's network sentric targeting.

The drones do not exist as separate entities called in to finish the job. The drones are nodes on the network. They are a part of the network. The network is the weapon.

+++++

<https://odysee.com/@psinergy:f/trim.9D16C584-16DA-4AB7-B8E8-3378565D3E33:c>

Invisible battles are fought as the US prepares for potential conflict with China or Russia. The value of the electromagnetic spectrum is paramount. The US military in 2021 [get it? Right about covey time.] activated its 350<sup>th</sup> Spectrum Warfare Wing, aimed at spectrum dominance and related electronic warfare.

This "Wing" ties to the Pentagon's **connect everything campaign known as Joint All Domain Command and CONTROL or JADC2...**

We do **"target waveform development,"** and then we do assessment.

Sabrina talks about this.

**Remember, we "develop the target."** And then we do assessment. Data reception to data transmission [determines] how good we are in the spectrum [the electromagnetic spectrum].

[11:55 min] Sabrina jokingly (or not?) says, what the narrative says about the "remote lobotomy" done by a click of your cellphone; because your bio-field is on the same wavelength, like beam forming.

Next video

Wall Street Journal - we need more data!

<https://odysee.com/@psinergy:f/trim.82BD66B7-D075-4F28-B484-9F9469C29378:a>

Sabrina says the primary issue that our Director of Artificial Intelligence leaves out, in her opinion, has to do with our "kill chain." We have a cyber kill chain because **your body is a NODE on a COMPUTER NETWORK.**

**Humans have an electrical body part, they're not allowed to talk about.** While they're not allowed to talk about it, we're walking ahead with 6G Cognitive Radio Networks (CRN) which are made out of human body communication and human bonding communication. They've been "wiring" our body on human bond communication. Instead of being able to develop our natural telepathy, cognition and empathy, it will all be handled by AI—that is not an exaggeration...

It's all a part of the WBAN (wireless body area network) the type of stuff they got going on for augmented reality.

While we have been busy **routing computer data through human bodies**, we do that with something called K-hop [hop-by-hop] routing because as **we put your body on the Cloud**, we really did. [Internet of things, block chain networks].

While we have been busy **routing computer data through human bodies, we do that with something called Biosensors**. Biosensors are DNA Analyte Derivative.

Why are we in this position?

Because the body area network [BAN] is part of something called **Industrial Cyberphysical Backbone and that is our Fourth [Industrial] Revolution**, having **everybody's bodies**, not figurative, but literally, **attached to the Cloud**.

It **provides a way to "watch your body" in real time and report back and forth to databases what's happening inside of you**. This is part of the "Department of Defense Global Information Grid Architectural Division" from June 2007.

We have a "digital twin" of you... cyberphysical interaction backbone (see IEEE's Industrial Cyberphysical Systems: A Backbone of the Fourth Industrial Revolution). That's why it's not a vaccine if it needs graphene.

It's a **global Information grid acceleration backbone point because the more sensors can communicate faster through put, the easier it is to route the data through your skin and bones**.

Being able to log into someone's body and make changes that not only alter their DNA, but their physical body and what they're seeing, and that's [your] businesses and your insurance companies that are into this.

That's your aura, that's your body's electrical part. [Think of Radionics.]

We use computer networks to target people with drones.

Due to the DoD's Global Information Grid Architectural Division, we all are attached with "Network Centric Warfare" [D.A. Mohan, CEO, DAC Intl] accessible to people that use something called "A Kill Box" because *you* have a "Digital Twin," and your home is known as a "Kill Zone."

We use computer networks to look through your bone and tissue, all utilizing AI.

[7:33] **We harvest energy from human bodies with SMART bioelectronics systems. That's why it's electrical engineers that are our new medical systems.**

**Harvesting energy from human activity or the environment; conversion into electrical power [light/heat] of ICT equipment.**

[8:45] **Take a look at all your BODY NODE SENSORS AND notice the BODY NODE COORDINATOR [your CELL phone is THE CENTRAL NODE or controller per say]. This figure: HEH-BMAC: Hybrid polling MAC protocol for WBAN's operated by human energy harvesting.**

**ENERGY HARVESTING FOR SELF-SUSTAINABLE WIRELESS BODY [yours] based on WBAN [wireless body area network].**

**HEALTHCARE—A PRIORITY-BASED ENERGY HARVESTING SCHEME.**

Drones can kill people with electricity and **how do we target your body? With your body's electrical part (aura/chakra) and the DoD is interlocked with countries** at the international level.

We make the biosensors out of your own cell structure; they are DNA/Analyte derivative...

**We have lots of ways to set those sensors off, change it into something else with transduction because you have a body part involved that used to be called the “human aura” and they have it “wired up” with 802.15 [IEEE] which is the wireless working group for your [cell]phone and for BlueTooth, and for many other things INCLUDING MILLIMETER WAVE WHICH IS YOUR BEAM-FORMING THROUGH THE BODY.**

**YOUR BODY AREA NETWORK IS IEEE 802.15.6.**

**THE SENSORS ARE IEEE 802.15.4**

**THE WIRELESS SENSOR NETWORKS THAT THEY CREATE FOR INDIVIDUAL ORGANS OR OTHER THINGS LIKE A RELAY ON THE OUTSIDE OF YOUR BODY ARE IEEE 802.15.5 [to route data]**

Wikipedia: IEEE 802-15.4 is a technical standard which defines the operation of a **low-rate wireless personal area network (LR-WPAN)**

There are light sensors [LEDs] and all types of biosensors. The biosensors themselves are not a bio-weapon; they are a tool that we use.

Nobody’s saying, “Hey, I hooked your ass up to the Cloud using your aura.” [Think Radionics]

[11:30 OMG] We use Thermal Dynamic Routing and that heats you up in one place of your body to interface with that particular side (or area) of your body with an 802.15.5 to route specific data. If it’s for your health that’s one thing, **but we have companies routing data through people for spectrum allocation and while we’re getting all this up and going, testing what’s called “Load Balancing” for computer routing through human bodies.**

It’s been going on since 2013, 2007, etc., but they’re doing things now for like, Amazon shipping.

A lot of people are already bio-hacking, so they know what this stuff is because they start their coffee pot with their brain, they open their garage door with...

**[14:10] [your] BIOFIELD AS A CONVEYOR OF INFORMATION**

...the biofield appears intimately **connected with information delivery within the organism. Thus the biofield HOLDS AND CONVEYS INFORMATION THAT IS VITAL FOR BIOC COMMUNICATION AND bioregulation.** Etc.

Sabrina recommends listening to Michael Levin: The electrical blueprints that orchestrate life TED Talk and others... when they talk about bioelectricity, that’s your “aura.”

The Emperor has no biofield.

Full control of people down to the bone marrow. This is an international effort.

The signal is endogenous and it comes from the inside out.

Note: Endogenous are substances and processes are those that originate from within a living system such as an organism, tissue, or cell.

**They have a wireless remote to your central nervous system.**

+++++

How do they hurt people? It’s based on your DNA:

YouTube Video: **INTERNET of BODIES 802.15.6**

[https://www.youtube.com/watch?v=pONnjJV\\_X8E](https://www.youtube.com/watch?v=pONnjJV_X8E)

1:06:00 They “route” through you [your body]. They think very little of humans. You are a flesh suit. You’re a battery, you’re a hard drive, etc.

How do they hurt people? They kill you with a bioweapon based on your DNA-based body part [your aura]. That signal that's coming in that they claim is off of a tower, they're lying; it's **[the signal is] going to come into your Personal Area Network (PAN)**, it's going to **select two of you humans** who have the fastest routing pattern **to protect the encryption on the striker unit** that is using electromagnetic warfare **to dodge a drone or** to prevent a drone swarm coming in.

They're going to **use your body as the network**.

**What happens when your body is now caring for your own DNA cause that's what generates your bio field? Your DNA is what's generating the signal to cause an Ebola topical inversion inside every single one of those humans across the street from you** [because they have a faster routing pattern]. That's called "network slicing" and artificial intelligence. And they have remotes.

Your body itself is a personal Internet.

We have fixed magnets in our children, filled them full of **graphene** and everything around them filled with it too. **That's what the inter-dimension remote controls utilize... They use magnets to wire the rest of us into submission.**

802.15.6 Wow, artificial intelligence (and international engineering) standards run by artificial intelligence databases that have been around since the 50's...

Do you want to actually program with the right encryption for the **new 6GLoWPAN** (Personal Area Network) using the machine-to-machine learning (ad hoc autonomous vehicular network) made of human bodies? [6G is for Power and to [push] data]

At the Artificial Intelligence Symposium **they were telling the DoD [to] just to log in and control your humans.** We're set up.

[2:30:00] Project SALUS must be feeding into something. IEEE WBAN 802.15.6? **International Engineering Standards**

802.15.4 RF sink [into your biofield] plus 5 N [nodes]; Personal area network

WPAN = .5 [802.15.5]

"and **exchange digital information using the electrical conductivity of the human BODY as a data network.**"

BAN = Body Area Network

SQL Hive BBI ??

...all using DNA.

**Every BODY has an ID.** If you get the "control" away from the creeps, humanity has a chance.

[2:37:28] You have an electromagnetic body part known as the human biofield. It's a DNA photonically driven and generated body part. Technologies are built into your biofield. Sabrina wants people to know that they are *wireless*.

Photonics is the way you levitate stuff with sound.

**Photonically-driven Schottky diode based 0.3 THz heterodyne receiver** by Iñigo Belio-Apaolaza, et al.

<https://opg.optica.org/oe/fulltext.cfm?uri=oe-30-24-43223&id=518957>

**Photonics-based technologies are key players** in a number of emerging applications in the terahertz (THz) field. These solutions exploit the well-known advantages of optical devices, such as **ultra-wide tuneability and direct integration with fiber networks**. However, THz receivers are mainly implemented by fully electronic solutions, where Schottky barrier diodes (SBD) are the preferred option as detectors and mixers due to their excellent response within the THz range at room temperature, and technological maturity.

**The terahertz (THz) frequency electromagnetic band** can be defined from 0.1 THz to 30 THz [1], **filling the gap between infrared light and microwave radiation**. Historically, radio-astronomy has driven the development of THz technologies, but in the last few decades, a variety of applications have attracted great interest, including telecommunications [2,3], material science [4,5], **biological and biomedical sciences [6–8], and security imaging [9–11]** among others.

[2:39:20] Now the Pentagon [with no accountability] has taken Nephalim wireless tissue engineering and wireless total piezoelectric control (brain damage) and given to their friends, weaponizing everyone against one another. No chip is need because we have been wireless for 6,000 years. Nothing's changed except what they call it: IEEE WBAN 802.15.6

We use satellites with electromagnetic warfare. Those are drones. We control those drones electromagnetically and **your body is electromagnetic**. This is not a secret as it's been going on since the Golf War.

[2:42:26] They're [military] not going to tell anybody that **your human aura [biofield] is what THEY USE for surveillance**. The drones are still there and they're still going to war with electromagnetic warfare *with* the invisible, **wireless human body part [biofield]**. They're not educating you. It's **generated by your DNA—it's an electrical body part—all of the time**.  
[DNA is a fractal antenna –Dr. Martin]

[2:44:35] **Our government is very clear that WE ARE WIRELESS and they are VERY CLEAR ON HOW TO MANIPULATE OUR BODIES WIRELESSLY**. Display: WPAN/WBAN, 802.15.4, [802.15.5 and 802.15.6]; this is a wireless sensor network and it says, "Using your body." That's what a Body Area Network is according to the IEEE standards for engineering.

**ALL satellites** are underneath the same Department of Defense using **PROJECT SALUS**, well that's a HUD—Heads UP Display for databases; underground, above ground, synthetic, convolutional databases.

**Telemetry is how I get it into you. You have to have something to aim at. I do, it's your CHAKRAS/AURAS—**that's your circulatory system.

In 2005, I let my military friends wire every single human to the Cloud. That's the way that Zigbee and Bluetooth are able to offer you any services with the SMART Grid...

[2:48:10] Meanwhile, you're holding our electromagnetic body part [biofield] and you're "tightening down on it" and you're **using it to neuro-modulate our behavior, our food... It's a wireless issue. Then we have software that transduces your tissue. Then we fill the air around you with electromagnetic, invisible waves**.

They built a remote control to bodies and play them like SIMMS utilizing Zigbee and Bluetooth. All the testing is for Silicon Valley, Brain-to-Brain Interface; they did it for "neurology."

Photonics is the way you levitate stuff with sound.

[2:52:42] **Graphene**. Back in 2020, at the Artificial Intelligence Symposium—**get AI into everything, we're ready. We have a NEW NEURO PROTOTYPE... It's brain-to-brain interface; it's called SYNTHETIC TELEPATHY**. They machined learned telepathy to put it on other people. In order to do that, they had to have a signal ON those humans that they can "connect" to; that's your Zigbee and Bluetooth. So shove it into kids and test on it. They think they're hearing the Voice of God and all that. That software was done in 1973.

Project Salus controls *this* among other things... They're chasing things in your blood stream you've never heard of.

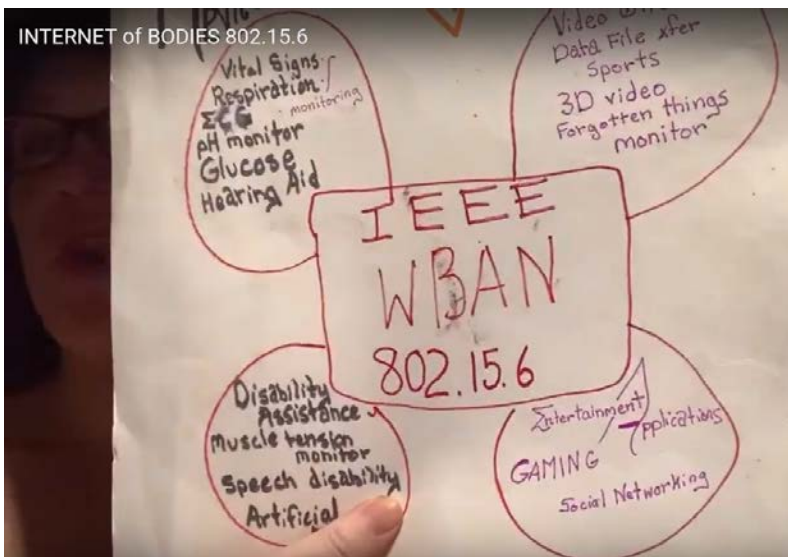

What have they been doing? Nephalim wireless tissue engineering humans into retardation and submission based on population and databases.

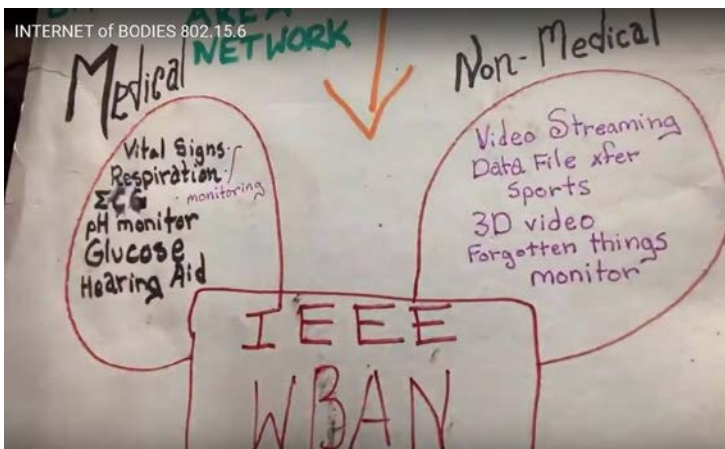

[2:54:30] About the **6GLoPAN encryption for the NEW DIGITAL ID and jumping states and getting away with it. THE DIGITAL ID IS IN YOUR BLOODSTREAM DOWN TO YOUR BONE MARROW WITH NANO TECHNOLOGY** according to articles and with universities in Indonesia, India and here in the US.

**6GLoPAN uses the human body in the BODY AREA NETWORK (BAN), BUT THEN TRANSDUCES THE DATA FOR THEM USING ELECTROMAGNETIC CONDUCTIVITY IN THE HUMAN BODY--piezo electricity, semantics, photonics and cinematics.**

We have a 6,000 year telemetry that's never changed, that **we are making use of; it's called the CHAKRAS**. It is the NODAL architecture for the human body. So here it is in a Wide Body Area Network (below). The only thing you are able to do with the IEEE WBAN 802-15.6 are three things (out of the many they use it for) are Entertainment, Gaming and Social Networking. The same wireless [802-15.6] we use for our phones and every single industry in the world.

The non-medical uses of routing data through your blood, skin and tissue are in the upper right corner with no accountability:

Secret technology; they've wired you to explode. **The signal comes out of the DNA. The signal is GENERATED BY THE DNA, the electromagnetic warfare. You're electromagnetic.** Like 80% of your immune system is electromagnetic. Now you have tons of little sensors that have been permanently sewn into your electromagnetic body since 2005.

They are using your body **to route data. They manipulate electromagnetic fields that are in our environment.** The spiritual world and the tech world have always been the same.

You have a heart chakra that's supposed to be built for 8 to 10 Hertz; **we're using 90 million in 5G.**

**So what do you think the 6G looks like? Terahertz spectrum. Machine-to-machine interface and autonomous strikers. Welcome to 6GLoPAN—YOU ARE THE NETWORK AND YOU'RE WIRED TO EXPLODE since 2005.**

The great reset—what a f—n' joke; all you're doing is lining up the databases that are already there.

The algorithms are *based on YOU*—YOU'RE DNA AND YOUR BIOFIELDS. So you can eat what you want; the **tower changes it [your DNA and/or biofield] automatically; there are no humans involved. You are only a new NODE on their interdimensional network.**

**The databases have already selected who lives and who dies.** Your body is used for “building materials” and interdimensional resources called prima-materia. That's what the WBAN/WPAN is really for.

**Your biofield will naturally transduce a signal.** Read this again:

**Your biofield will naturally transduce a signal.**

**transduce**

1. ([transitive](#)) To [convert energy](#) from one [form](#) to another
2. ([transitive](#), [biology](#)) To [transfer](#) or copy [genetic](#) material from one [cell](#) or [virus](#) into another.
3. ([transitive](#), information) To [transfer](#) or [convert information](#) from one [form](#) or [medium](#) to another.

**These are databases, these are machines; there's no humans involved.**

**SOSA AND MOSA OPERATE (since 2005) ON MAGNETS sewn into YOUR electromagnetic DNA-generated body parts [biofield].**

**Silicon Valley can control your magnetism [your electromagnetic field/biofield].**

LIDAR drives the SMART car, how? It establishes an electromagnetic field and then operates it from there. That's signal transduction.

**[YOU'RE ELECTROGMANETIC AND your biofield will naturally transduce a signal. THE SMART CAR'S LIDAR ESTABLISHES AN ELECTROMAGNETIC FIELD; COULD IT POSSIBLY BE ESTABLISHING A SIGNAL WITH YOU? THINK ABOUT IT, THINK HARD.]**

[3:11:11] It's transport, testing for genomics [unaudible] and then whether or not your tissue vascularity hold the changes that they've made. For who? Their friends to look through you and fight. **For what? Your soul.**

It's interdimensional warfare.

Mark 8:36-37

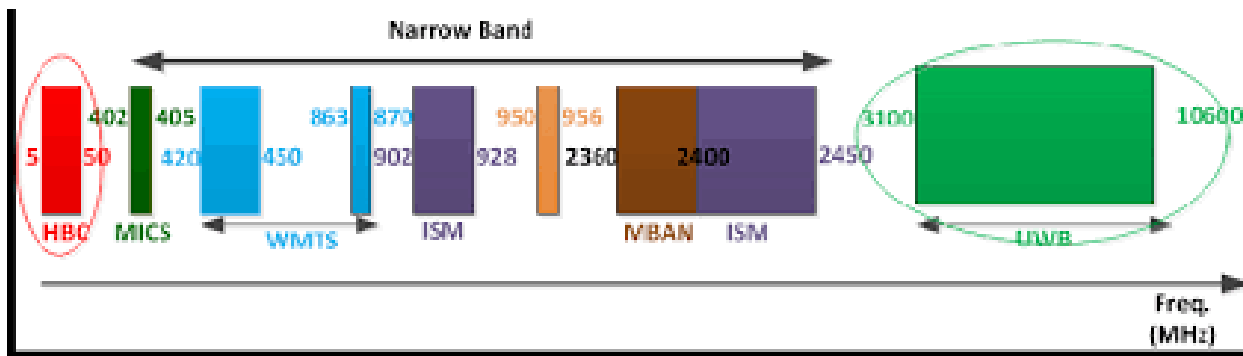

For what shall it profit a man if he shall gain the whole world and lose his own soul?

Stopped at 3:12:15

+++++

**Biosensors , Sensor Hunt3rs and Electronic warfare inside human tissue/C4ISR this mornin .. w/usaf**  
<https://odysee.com/@psinergy:f/trim.210928DC-9D16-4EFF-8CE4-91AA098D6EE1:3>

[2:50] From dial up to cable modem, now to BAN (body area network) since 1995. They're logging into your body because your body is electrical. You're on the radio frequency band. MICS is the medical implant communication system (from 60's, 70's, 80's and other things they use like RFID), but we don't need RFID because we have HBC (human body communications) directly:

Electroceuticals is wireless drugging.

What is computer network doing in my skin? Why are these sensors inside of me and in such a way, that they are made out of my own DNA? My own body; my own nutrients. That's the new green energy.

Don't call this a bioweapon; it's a system that we use to report on what's inside of you all day long. We do it soil, nano, manufacturing and we do it since 1958.

The only way to turn off the biosensors is by turning off your DNA. What happens when you turn off your DNA? Your biofield is your electrical body part; your heart is electrical. They got busy hooking your asses to the Cloud. They are at the physical layer of changing my cell structure.

The human bonding communication protocols for computer routing on the phone. Digital twin architecture—a digital twin of you in the Cloud.

See NTT Proposes the "Digital Twin Computing Initiative"... digital information reflecting the Real World to Synthesize Diverse Virtual Worlds, Generate NOVEL Services and BRING ABOUT SOCIETY OF THE FUTURE.

This is an industrial system since 1995. Body Area Network, the nano is inside of you and your body is inside the Personal Area Network. [Nano has transistors and resistors that work with the SMART Grid. Full duplex; blow your eye sockets wide open. There's some part of you in there made of hydrogel made of gold which is very conductive.]

Net-Centric Warfare.

We have an Industrial Internet of Things (IIoT) and it works with the Net-Centric GRIDS that are actual sustainable KILL BOX-relatable actual software virtual networking GRIDS. The GRID IS MADE OUT OF SENSORS INSIDE THE HUMAN BODY, made "up" of human bodies [networking through human bodies].

See Sensors, Free-Full-Text, "Towards a Secure Thermal-Energy Aware Routing Protocol in Wireless Body Area Network **Based on BLOCKCHAIN TECHNOLOGY**" [Blockchain mimics DNA].

What's a routing protocol? Computer networking through human bodies. Inter-Ban Interference, yeh, you and another body.

Why are we talking about this? Because you have electronic warfare going on, and instead of telling people, you use their bodies. We are exploiting the electromagnetic spectrum, and your *ass* is on *that* spectrum; just like we have you *tethered* to the Cloud.

[10:35] Sabrina discusses: DTBR: A Dynamic thermal-balance routing algorithm for Network-on-a-Chip (*Science Direct*) and all the different things they do with reactive routing algorithm.

[This is] getting deeper into **how we change things inside of you with these “system on a Chip and network on a Chip.”** Different patterns of traffic and **how to change things [e.g.,] power density, voltage on the inside of you with those bio-electromagnetic algorithms.**

So the way that we do that **is that we change out the temperature.** [Each node has consumes energy and the electricity transforms into heat.] **We heat up the different nodes inside. We delay certain packets; they have “payloads” and then we push other things harder. That’s a lot of routing through the human body.**

So one more time, **biosensors are made out of YOU;** they are DNA Analyte Derivative; they are permanent.

The Network Centric Warfare uses cognitive Body Area Networks, [that] watches you think in real time; it’s an industrial international system. See Psinergy’s video “Drone Kill Communications” and Drone Kill Communications net Illustrated on ComputerWeekly.com

To understand the 6G end of it, see 6G Cognitive Radio Network CRN on Psinergy’s Odysee Channel) or go here: <https://odysee.com/@psinergy:f/trim.E7EDAC7C-99F2-416C-A451-AD1639673DDC:7> 8/4/23

This will help you understand how your body is connected to the Cloud.

Paper: Sixth Generation (6G) Cognitive Radio Network (CRN) Application, Requirements, Security Issues, and Key Challenges, Aslam et al.

Sabrina says she hasn’t even got to the telepathy empathy pre-cognition part. We are killing with computer networks. How do we syphon neurons out of your body?

End of video

### Netcentric Warfare & Starseeds .. prepping data for upcoming videos

<https://odysee.com/@psinergy:f/trim.AE6DCFFA-E2DE-4C6C-8B1B-5EADF3B66D5B:4>

With biosensors made out of your DNA, I log into YOU using a computer network protocol, normally used for computers, but it’s into YOU, using a Wireless Body Area Network(s) (WBAN).

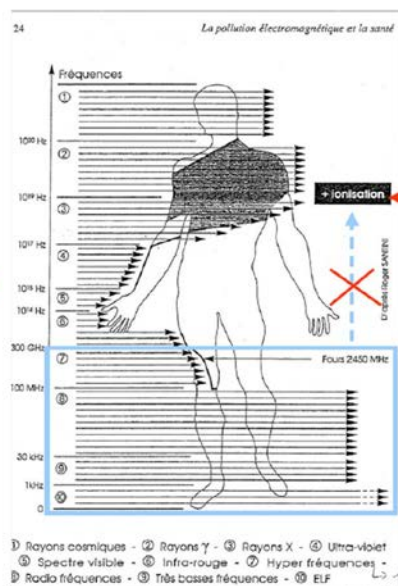

It is the Internet of Bodies / Internet of Things [or Industrial Internet of Things (IIoT)] and it works off of radio frequency which routes through the body. We use computer game theory and Internet routing through the body. The Blockchain mimics DNA so the Blockchain is routed through here too.

[See Towards a Secure Thermal-Energy Aware Routing Protocol in Wireless BODY Area Network Based on Blockchain Technology.]

Then we take electromagnetic resonance and frequency and measure it in the body.

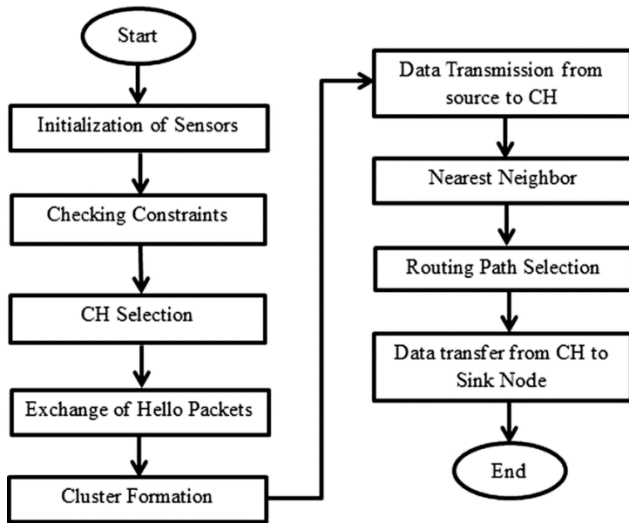

#### ABSORTION SELECTIVE DES ONDES ELECTROMAGNETIQUES PAR LE CORPS HUMAIN

- 1-Rayons cosmiques
- 2-Rayons γ
- 3-Rayons x
- 4-Ultra-violet
- 5-Spectre visible
- 6-Infra-rouge
- 7-Hyper fréquences
- 8-Radio fréquences
- 9-Très basses fréquences
- 10-ELF

Then we apply those radio waves through the body, and not tell anyone, taking tons of measurements using different protocols [IoT Based WBAN Routing Protocols], thermal aware.

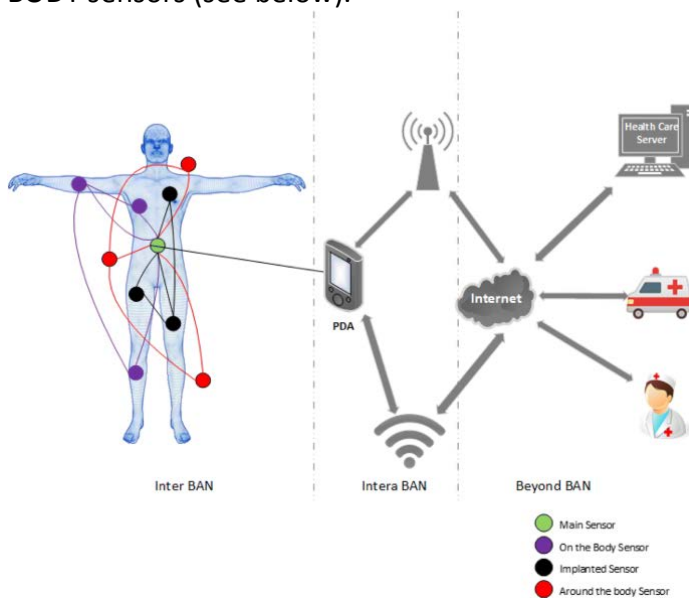

“Energy Efficient Dynamic Cluster Head and Routing Path Selection Strategy for WBANs:”  
 Start, Initialization of Sensors, etc, **Data Transmission [TO THE K-HOP] Nearest Neighbor...**

I (Sabrina) am a **sensor hunter**; it is **MY JOB** to **LOG** into **YOU** [and] cause a cytokine storm for a **bioelectric algorithm...**

They're going to work and hunting the sensors down **INSIDE OF YOU**. All they do is “gas light” because, in my opinion, you're letting them. Local Information Grid, biosensors, etc. it's the **SAME SYSTEM**, which is what? Electronic warfare and they have a **Digital Twin of YOU**.

[2:55] We now know Routing Computer Traffic with **MAIN, ON THE BODY, IMPLANTED** and **AROUND THE BODY** sensors (see below).

It's their job to go to work with their professional “Sensor Journals” in different ways we route throughout the body, and it **may be** a doctor; it could be some other person; **you don't know because it's ALL ARTIFICIAL INTELLIGENCE REPORTING TO WHO?**

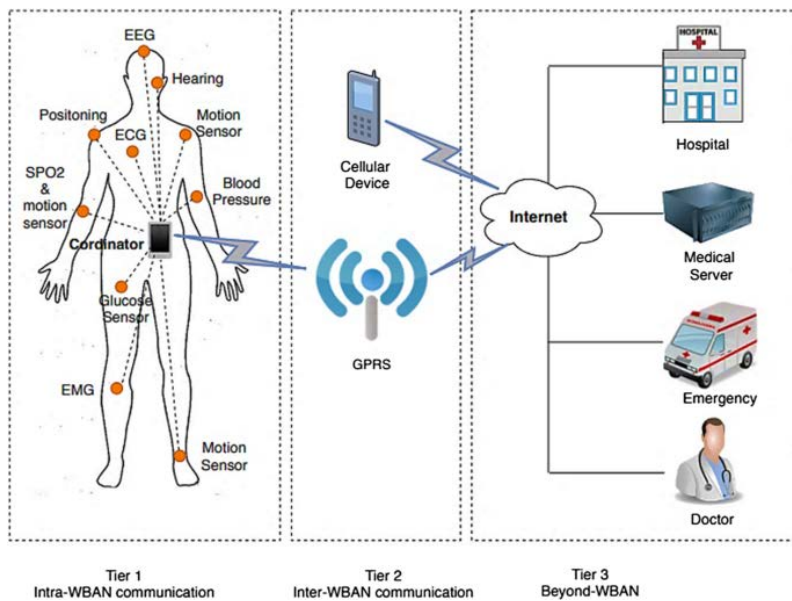

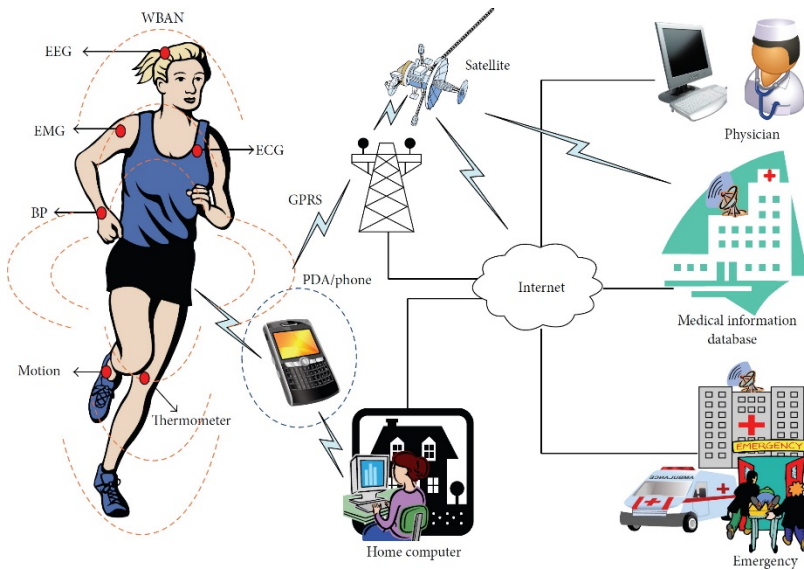

[BAN [Body Area Network] reporting to who? The hospitals you say? Where is the **CENTRAL COMMAND CENTER? MOST LIKELY AI?**]

Data collection and transmission rely on TECHNOLOGIES such as hardware [nano/graphene?] specifications, MAC layer, and ROUTING(6, 7). WBAN needs to quickly and efficiently forward the DATA SENSED BY THE SENSORS...

ROUTING TECHNOLOGY [using your body] is to solve the problem of data transmission IN THE NETWORK(8) [your body is the network].

LOOK AT ALL THE DIFFERENT IMAGES TO GET THE REAL PICTURE, reporting to the so-called "hospital." All you have to do is search on "architecture of wban."

FROM YOUR BODY' TO THE CELL PHONE [the coordinator], TO THE HOME COMPUTER, TO THE GRID TO THE SATELLITE, GPS TRACKING TO THE INTERNET OF THINGS [SERVER] AND THE COMMAND CENTER.

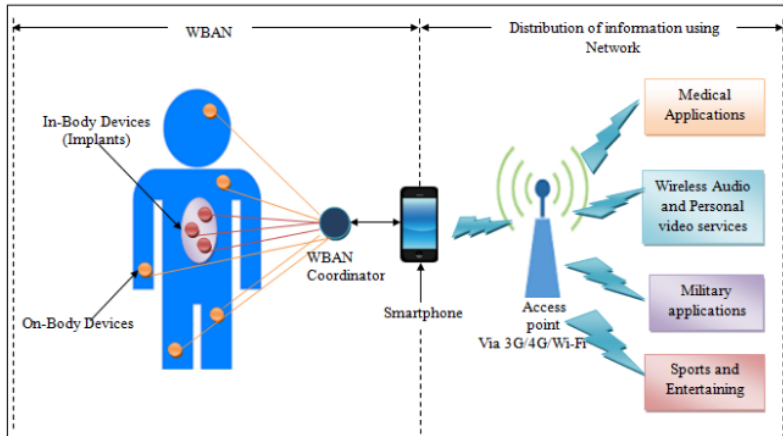

Design of Reconfigurable and Scalable WBAN for Secure Communication using Rehashing Key Agreement Protocol

Abhay Kshirsagar

Research Scholar G.H. Rasoni College of Engineering, Nagpur

Dr. Amol Deshmukh

Fig. 1 represents the overall architecture of WBAN which incorporates a number of sensor nodes operating within wireless network. Sensor node placed on human body that can continuously capture the parameters using devices like ECC, ECG, body temperature, and blood pressure sensors. Sensor data is transmitted to coordinator which manages the sensor node. By using coordinator, sensor data is stored in Smartphone and then it is communicated via 3G/4G/Wi-Fi. Finally, these data can be accessed by various persons to analyze situation based on application.

Oh, you see a “Military Application” above? How about the wireless AUDIO?

[The body is FREE FOR ALL CANON FODDER, JUST A FRIENDLY FIRE CASUALTY. ELECTRONIC WARFARE ON A GLOBAL LEVEL.]

[7:45] What is Hypergraph Transfer Protocol? What are X Sensors? Hypergraph the world’s most robust, decentralized network. A system and method of connecting one or more “client” applications with knowledge representation servers.

How do they physically change the air molecules around your head, so that you have a “physical” experience? Hypergraphs. Sabrina explains it in detail.

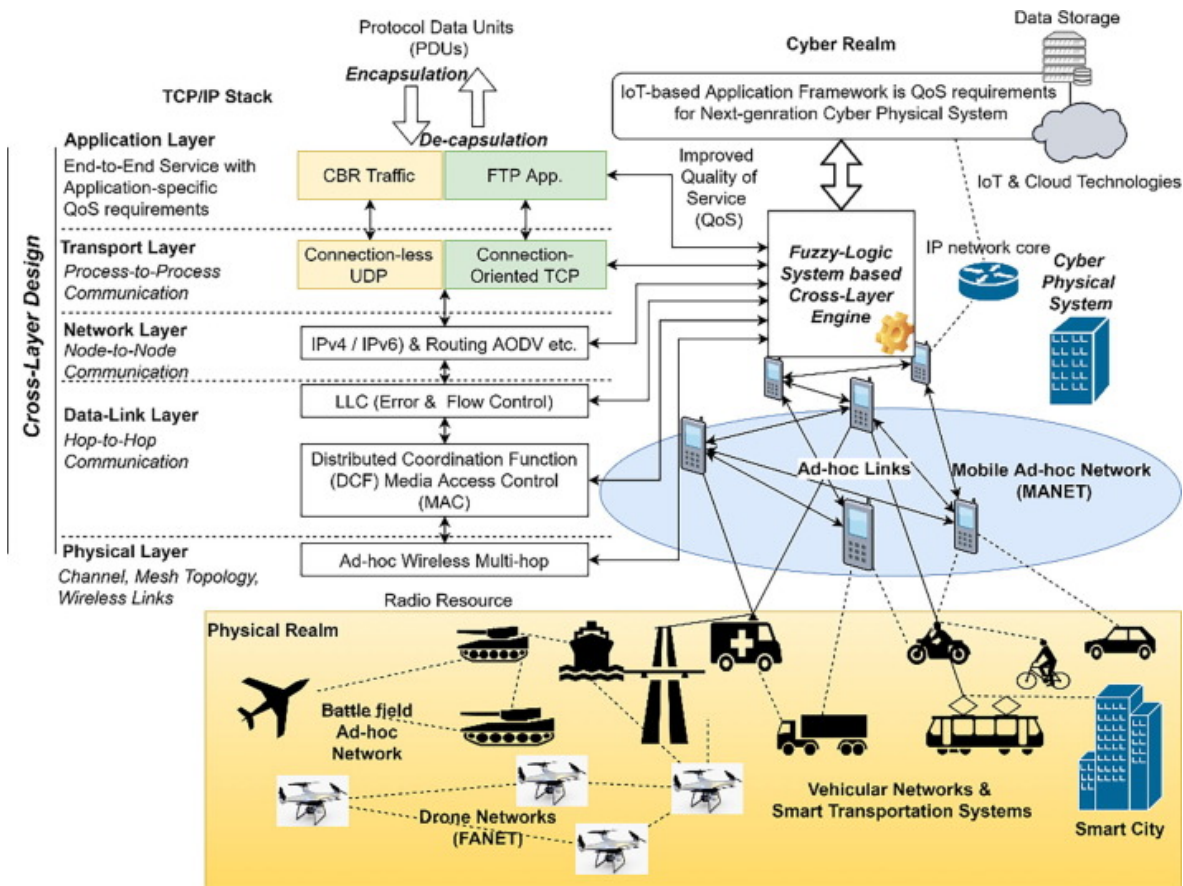

If we’re going to make you believe that *you’re seeing it, we’re going to rearrange the neurons in your head*, and we have been. It’s called Spiking Neural Networks. Oh it’s a SPIKED PROTEIN. **SPIKE PROTEIN TAKES MEASUREMENTS OF YOUR NEURONS which are body wide.**

**PROGRAMMABLE ELECTRIC FLUIDICS...**

Where are we at? Brain-Machine Interface.

Fuzzy logic based cross-layer design to improve Quality of Service [to who?] in Mobile ad-hoc networks **for Next-gen Cyber Physical System** – Science Direct.

What does that mean Sabrina? Well where's your Orion Group?

Orion: Google's Software: **Defined Networking Control Plane / Semantic Scholar. FOR YOUR BODY. THEY HAVE MULTIPLE DIFFERENT WAYS THEY'RE "WATCHING" YOUR BODY AND HOW IT FLOWS DATA BACK AND FORTH ON THE CISCO CONTROL PLANE...**

**HOW WE "ROUTE" THROUGH YOUR SKIN AND BONE.**

What's an EEG overlay? They overwrite your brain tissue from the inside out.

If I have the ability to take the bioelectric CODE [yours] and put your ass on the Cloud against your will, without your knowledge [where] nobody can turn it off because the only way to turn it off is to turn off your DNA.

You're not going to get out of these "databases" because they are at the Industrial level.

None of these systems have been set up to save anybody. **They've been set up for TRANSHUMANISM, ELECTRICALLY REARRANGING PEOPLE'S BODIES.**

**THEY ARE REARRANGING OUR BIOELECTRIC CODE.**

**13:28] WHAT IS BIOELECTRICITY? From pre-neural circuits to Electroceuticals—WIRELESS DRUGGING.**

These people: **BIOLOGICAL INFORMATION BEYOND GENES: BIOELECTRICITY, "THEY HACK and FRACK THE BIOELECTRIC FIELD—that would be YOUR AURA.**

**Sirius and Orion... Code makes perfect sense if you're ROUTING [secure data] THROUGH HUMAN BODIES.**

End of video.

Posted 8/15/23

HBC (human body communications)—a promising alternative to radio wave [microwaves] based communications like Bluetooth. However HBC requires TINY amounts of electrical signals to be sent through the body.

"Galvanic" HBC can result in field intensities higher than the safety limit, close to the point of excitation, at certain frequencies.

[6:22] PAN (Personal Area Network) is like routing data in and out of you with game theory in people's bone and tissue?

**[The biosensors are made out of your DNA inside of you. Your body IS the network. --Sabrina] These biosensors are made with YOUR tissues (amino acids, peptides, etc) [DNA Analyte Derivative] attached to nanotechnology (transducers) which use your red blood cells & minerals to carry the electrical signal to RF sinks. The RF sinks can act as a conduit to uncouple cells, disassociate fields, collocate neurons, mesh with the BANs, etc]**

They are sensors hunters. They hunt people wearing a little headset (since 2007) using cognitive technology threat warning system tech and **route through** people's veins and arteries sitting at their desk. A lot of it is artificial intelligence.

Sabrina reviews this article:

**TURNING THE BODY INTO A WIRE** (IEEE Spectrum Nov 24, 2020)

**WHEN THE HUMAN BODY IS THE COMMUNICATIONS CHANNEL IT'S HARD TO HACK THE DATA**

<https://spectrum.ieee.org/turning-the-body-into-a-wire>

The list of wireless devices besides medical devices, includes wireless earbuds, smartwatches, and virtual reality headsets, [fitness trackers] smart contact lenses, DIGITAL PILLS THAT TRANSMIT SENSOR DATA will be at RISK.

All of these devices need to transmit data securely at low power and over a short range.

[IS THIS WHY 5G ANTENNAS WILL BE PLACED 300 TO 500 FEET APART?] **That's why researchers think about these devices as "individual components" of a "single human-size wireless network, referred to as a BODY AREA NETWORK [BAN]—it's the NETWORK these devices create. Also known as "INTERNET OF BODIES (IoB)" which share some of the same needs as a SMART home.**

At the moment, IoB devices use wireless technologies, mainly Bluetooth, to communicate.

### **YOUR BODY IS A SMART HOME**

People are putting more and more devices in and on their bodies, whether they're medical or consumer tech.

**We call the method of SENDING SIGNALS DIRECTLY THROUGH THE BODY "ELECTRO-QUASISTATIC HUMAN BODY COMMUNICATION—ALSO KNOWN AS A BODY CHANNEL. By exploiting the body's own conductive properties, we can avoid the pitfalls of both wired and wireless channels. [JUST MAKE THE BODY A "CHANNEL" AND SEGREGATE IT AS ELECTRO-QUASISTATIC COMMUNICATION, THEREBY ALLOWING SIGNALS DIRECTLY INTO YOUR BODY.]**

You need to only define "1s" as some voltage. By measuring the voltage over time, at the other end of the wire, **you end up with the ORIGINAL SEQUENCE of 1s and 0s.**

What can you do instead [of wearing wires]?

The body's interstitial fluid is responsible for carrying nutrients from the bloodstream to the body's cells, and is filled with proteins, salts, sugars, hormones, **neurotransmitters** and all sorts of other molecules. The **interstitial fluid allows us to establish a CIRCUIT AMONG TWO OR MORE COMMUNICATING DEVICES SITTING PRETTY MUCH ANYWHERE IN THE BODY.**

Typically these devices would have to be connected wirelessly. Here's how it works with a BODY CHANNEL [YOU]. The pump, monitor and SMART watch would be outfitted with a small COPPER ELECTRODE ON ITS BACK, IN DIRECT CONTACT WITH THE SKIN. Each device has a second electrode, not in contact with the skin that functions as a floating ground [electrode on the receiving device].

When the wearable monitor takes a measurement, it sends data to the pump and the SMART watch which can store data for LONG-TERM MONITORING AND SEND IT TO THE COMPUTER [OR CENTRAL COMMAND STATION.] FOR STORAGE AND ANALYSIS.

The monitor communicates by encoding data into a **series of voltage values [your body voltage] then it TRANSMITS these values by APPLYING A VOLTAGE BETWEEN ITS TWO COPPER ELECTRODES**—the one touching your body and the one acting as a floating ground.

This **applied voltage very slightly changes the POTENTIAL OF THE ENTIRE BODY** with respect to Earth's ground. **It's enough to be picked up BY DEVICES ELSEWHERE.**

**Sabrina: Like I said, decoupling your electrical field by decoupling your Circadian Rhythms. They interrupt it.**

**One of the biggest challenges is selecting the best wavelengths for the electrical signals. Electrical wavelengths are much longer than the RF wavelengths for wireless communications.**

Astute readers may have picked up that we haven't mentioned one key aspect of circuits before now: A circuit needs to be a closed loop for electrical communication to be possible. Up until now, we've restricted our discussion to the forward path, meaning the part of the circuit from the transmitting electrode to the receiving electrode. But we need a path back. We have one thanks to parasitic capacitance between the floating ground electrodes on the devices and Earth's ground.

There are two loops. **These electrodes go THROUGH the body to the ground, and back**

**THROUGH the air to the floating-ground electrode ON THE RECEIVING DEVICE.**

Remember that the circuit loop with the transmitting device and the one with the receiving device share the body as a segment of their respective loops. Because they share that segment, the receiving device also responds to the slight change in the body's voltage. The two electrodes making up the receiving device's capacitor detect the body's changing voltage and allow that measurement to be decoded as meaningful information.

**Our method for turning the human body into a communications channel shifts the distance at which **SIGNALS** can be intercepted from the 5- to 10-meter range of **BLUETOOTH** and **similar signals** to below 15 centimeters. In other words, **we've reduced the distance over which an attacker can both intercept and interfere with signals** by two orders of magnitude. With our method, an **attacker would need to be so close to the target that there's no way to hide.** **[WHAT ABOUT 5G/6G ANTENNAS? THEY ARE CLOSE IN PROXIMITY.]****

**Data is always most vulnerable to a malicious attack when it is moving from one point to another, and our IoB (Internet of Bodies) can finally close the loop on keeping personal data from leaving your body. [REALLY?]**

This article appears in the December 2020 print issue as **"To Safeguard Sensitive Data, Turn Flesh and Tissue Into a Secure Wireless Channel."** **[Your BODY CHANNEL that is.]**

**Sabrina: Your BODY IS THE NETWORK, YOUR BODY IS THE NODE AND YOUR BODY IS A WEAPON. These are OPEN SOURCE MATERIALS, go find them.**

End of video

### How do they get the biosensors in me? Part 1 (8/28/23)

<https://odysee.com/@psinergy:f/trim.CBC4A92A-FC10-4A5F-A890-F8E1CE2586D8:9>

#### Sabrina points out papers to back her statements, for example:

[2:25] *Exploring the Potential Applications of Engineered Borophene in Nanobiosensing and Theranostics* by Ananya Srivastava et al.

Sabrina explains this paper stating a monolayer of **boron** is a 2 dimensional (2D) material. Then you'll have how it's put together, the chemical that it uses, the transduction that it uses in each direction because **Biosensors require your molecules made out of your body.**

**Abstract:** A monolayer of **boron** known as borophene has emerged as a novel and fascinating two-dimensional (2D) material with exceptional features, such as anisotropic metallic behavior and supple mechanical and optical capabilities. The engineering of smart functionalized opto-electric 2D materials is essential to obtain biosensors or biodevices of desired performance.

2D nanomaterials such as **graphene**, phosphorene, MXenes, molybdenum disulphide, black phosphorus, etc., have **better electrical conductivity and a higher electroactive surface area, which are the characteristics needed to immobilize biomolecules for sensing and biomedical applications.**

**Boron is the neighbor of carbon, so borophene has properties like graphene [27].**

**The single sheet of boron, or borophene, is regarded as a wonder nanomaterial.**

**Boron** has also been recently utilized in various innovative technologies in the areas of **energy conversion, nano-engineering, and photonics.**

**In a single molecule, borophene possesses a variety of band gaps of different kinds that run in distinct directions.**

#### 5. Borophene-Based Nanosensor for Biological Molecule

#### 6. Borophene-Based Gas Nanosensor

#### 7. Therapeutic and Bioimaging Applications of Borophene

Another promising application is its use as a **drug delivery platform.** Borophene's high surface area and **tunable surface chemistry** make it an attractive **material for attaching and delivering drugs to specific target cells** or tissues.

9/14/23 Thursday Coffee 2023

<https://odysee.com/@psinergy:f/trim.79A9D811-152C-46B5-BDA6-7C11880827F4:8>

Regarding the CoV agenda, They (pharma) all got together and made nice and now they get to promote one another for more money; and while they do that, the last place that you will be directed to after watching the Pfizer documentary by these people is the BIOFIELD and the triage with the bio sensors.

They're [you] thinking it's a bioweapon. One more time, it's OUT OF YOUR HANDS, but it's not. **It's your body part [AURA/BIOFIELD]. It's not a *demon* field. It's a biological field of YOUR electro-homeostasis of every cell inside your body. And they're making your internal electrical homeostasis pure HELL on purpose.**

Sabrina says she believes in Jesus Christ of Nazareth which is why she is not going to yield control of this Holy Temple that belongs to Jesus to these people by being silent about mathematics and *systems* that are inside of bio-medical engineering with the IEEE of life science with an FCC-mandated medical body area network since 2014.

Any of them could've gotten up there and said that. The reason that they're not is **because this is transhumanism; this is Agenda 2030 already done which means**

- 1) **there's no getting the biosensors out;**
- 2) **there's no turning off the satellites;**
- 3) **there's no getting OUT of the GRID;**

Therefore I am working on how to figure out how long will we have cause again, it's satellite PNT and its Osiris on the 5G with the CUBE set and the nano satellite—which is where all the money is and has been for years.

So how can we continue “buffer” these biosensors, get the nano out of us? How long can we last? That's what I've been working on this whole time by the math. I thought other people would want to know **and stand tall for Christ. This is HIS dimension...**

**YOU DON'T SEE MEDIA PUTTING BIOFIELD RIGHT THERE...**

+++++++

Once 5G/6G gets installed, say goodbye to your circadian rhythm sleep; it's pretty much gone anyway, say hello to LIVE monitoring and autonomous sensing in many, many ways—sensors already in your body, wearable sensors and sensors all around your environment. Hello to drones, hello to autonomous vehicles, goodbye \_\_\_\_\_ you fill in the blanks.

*Here a sensor, there a sensor, everywhere a sensor.* Who needs a farm when they can *farm you and your data*? Since 2007, the **net centric** (Mosaic warfare) can, using an EEG headset, enable these “systems” **to hunt you by your biosensors [sensors inside you, wearable and exterior] in your kill box** aka your home...

**Is covid electronic warfare creating sickness in vivo? Is it?! 9/16/2023**

<https://odysee.com/@psinergy:f/trim.83248DFE-EB56-48AB-B06F-DC870777A5E3:4>

Covid is an electronic warfare [and has its own “network **Cov-BAN** per AIS below]. They can “log” into you from wherever they are. That is *Mosaic warfare*.

What organs comprise of the Immune System? [One being] Your skin is the largest organ in the body. Your Biofield is bioelectric and quantumly moves around in the lymphatic system. So it makes it perfect for an

electronic or bio-electrically hackable, morphogenetic regenerative **field** especially given that **it can utilize the topology of the skin** to stretch out into tissue, scaffold new limbs or whatever.

80% of your immune system is your biofield and it is electromagnetic.

The DoD has MQ-9 Reaper drones individually tethered to ground to enable *autonomous sensing*. How? Are you tethered to the Cloud? What's your IP address [your MAC address]? **All [of] your biosensors are on 802.15.4**. Two radio frequency “sinks” **[at the heart and bladder]** to *pull in* **802.15.5** which are those wireless mesh sensor networks that **are all around you**. [And] that's without using Omnet to *log into* you right there in your *kill box*—inside your home with the help of your local internet [wireless] service provider. [Let's not forget about LED lighting.]

How am I *logging into* your body? That's **802.15.4 the biosensors**. **Project Maven is Mosaic warfare—that's Google and that's letting us log into your 802.15.6**, which is **why we have network game theory routing and bio-electromagnetic algorithms running through humans**.

So if you're not on the Covid Wide Body Area Network [**Cov-BAN**] per the Artificial Intelligence Symposium [AIS, 2020] with our MQ-9's tethered ground and Project Maven, which is **Mosaic warfare** that the Google people [employees] walked out on because they did not want net centric warfare to have the ability to [attack] somebody in their home—their kill box:

**Project Maven** = Mosaic warfare = net centric **node [human body] access** which can order drone update **or** order SMART grid update **or log into 802.15.6** = MQ-9 Reaper drones individually tethered to ground (baseline or local; scan ad hoc)

Since 2007, the **net centric** (Mosaic warfare) can, using an EEG headset, enable these “systems” to hunt you by your biosensors [sensors inside you, wearable and exterior] in your *kill box* aka your home...

Cybersecurity 2022 for the 6G LOPAN (personal area network) for a “striker” ad-hoc **vehicular** network moving on the fly—**machine to machine language only** with no interruption by the Commander on the ground. There's your drone, there's your “striker, or SWARM—either way. **Here's your Body Area Network [YOU]. The signal from the striker vehicle, dictated by machine-to-machine language only and only from the SMART Grid application—NO HUMAN INVOLVED**, [is that] if your body is the **OPEN, SHORTEST PATH FIRST** [when the signal is fired] which is a mathematical metric of **ROUTING** (an electrical signal) **through a human body due to it being a NODE ON A NETWORK**.

**When we define the human body as a NODE ON A NETWORK, everything changes and it has in 2012** with legal autonomous weapons statement(s) [from the] Department of Defense directive 3000.09.

-----How humans/NODES can be an innocent target:

**Your BODY IS A NODE ON THE NETWORK.**

[When a signal is fired and] In **the event that you are “open shortest path” first** or link-state vector routing on a man-net cognitive radio network, you happen to be available [a target] to an intermediate state, whether **to hold data or become capacitive to other formats of data within your PERSONAL AREA NETWORK—not even just your BAN [body area network] or your two [person] or four [person] “connection,” that SIGNAL HITS YOU MATTER WHAT**. [There's] no Commander to interrupt [just machines].

[11:51] Now that's pretty serious for cybersecurity on a **SIXTH GENERATION [6g] WIRELESS PLATFORM**.

**STOPPED AT 12:00**

+++++

**Saturday thoughts** - 9/18/23

<https://odysee.com/@psinergy:f/trim.8EFB829F-DCC6-4897-8A71-B4D1CC5F95B5:d>

I-pads and databases are interfacing daily for Bioconductor, biomedical, bioinformatics software that also reports to **EIDSS which is the electronic integrated disease surveillance system** that then reports to another **COVID body area network (COVBAN)** of who does and does not have more injections and of what kind of injections or augmentations would be my [Sabrina] suspicion because these systems of human augmentation did not start five years ago.

**EIDSS (electronic integrated disease surveillance system)**

EIDSS is a computer-based disease surveillance tool that links together the different levels of a country's disease surveillance; and PACS (Pathogen Asset Control System) is a system that ...

It is **designed to strengthen and support monitoring** and prevention of human and animal...

**The biosensors are a FORMAT OF SOFT ROBOTICS.** That's 2005 commercially available to Zigbee and Bluetooth for light switches which we now see with virtual light communication with just the Li-Fi / Wi-Fi, the light and air and the ubiquitous [present, appearing or found everywhere].

Wireless drugging and wireless tissue engineering –industries and products that have been out there for over 8 years.

Regarding put your masks back on. People aren't nearly as stupid as everyone has been led to believe. They're well paid.

So many were involved with the deployment of **Operation Warp Speed** whether by law enforcement, local people or people involved with the SMART city Agenda 2030—which almost requires **human augmentation with soft robotics biosensors, synthetic biology and biosynthesis... libraries that are much like the brain imaging library** \_\_\_\_ that looks at you and your blood **IN REAL TIME to determine**

**WHERE YOU CAN PHYSICALLY MOVE TO;**

**HOW LONG YOU CAN PHYSICALLY STAY IN THAT LOCATION;**

**WHERE YOU ARE ALLOWED TO VISIT; AND**

**WHERE YOU ARE ALLOWED TO REMAIN IS IN A RESIDENCE**

These **systems of digital control are not just some GRID anymore;** they are already in place.

2019 when the rights of passage disappeared, etc., 2005 lacing bodies to the Internet; it's already 2023. Now turn to me and say, "Put your mask on and take this lethal injection." We make your children go away, either way. No more healthcare for you, no more pension, no more... unless you do what we say.

The digital identifier has been in everyone for the cybersecurity standards since 2009. Open source. There are too many people involved in all of this and you're not going to arrest half of the nation.

So what are you doing with all this stagnation? There wouldn't be a COVBAN without a bigger plan here—Zeuss and Scorpio software inclusive now that it's *movable*—for testing uranium by the way—more movable because it's NOT just for that.

**Why is it that Benadryl suddenly doesn't work?** What inside of that drug Benadryl worked to blocked the Ace 2 Receptor which is the **primary component of the spike protein—watching you and reporting properly.**

**How are they watching you? From the INSIDE OUT—in your tissue, IN REAL TIME.**

Tell me how...

I don't want graphene growing in my blood---THEY DO. I don't want to commit to THEIR systems of... slavery.

[26:36] We have Digital Twin Computing worldwide and this is part of the industrial cyberphysical backbone. There's a digital copy of you that can be adjusted in REAL time because of the SMART Grid and your biosensors. These are Department of Defense directives.

June 2019--**The Digital Twin Computing White Paper** ver 1.0.0, Takao Nakamura, **Nippon Telegraph and Telephone\***

**Digitalization for humans** from telephony through to email and social media, **and for things** from maps through to digital appliances and self-driving cars has dramatically advanced. In future, **more advanced digital societies will emerge** and more closely **unify** the **real** [in real time] **world of things**, humans and societies with their high-precision digital information counterparts **in cyberspace**.

These will be the **highly digitalized next-generation societies** in which further **expansion of human knowledge and emotional expression through large-scale, high-accuracy predictions will be enabled by high-precision digital information in cyberspace** seamlessly **linked** to the real world. Furthermore, these societies **will be capable of more advanced and more social communications** (e.g. consensus building and decision-making) than the conventional, familiar communications (e.g. knowledge sharing and **human collaboration**).

\* **The Nippon Telegraph and Telephone Corporation**[a] (NTT) is a Japanese telecommunications holding company. Ranked 55th in Fortune Global 500, NTT is the fourth largest telecommunications company in the world in terms of revenue. The purpose of the company includes **to conduct research relating to the telecommunications technologies** that will form the foundation for telecommunications.

See also **Dimension Data, NTT Communication, and NTT Security bundled into NTT Ltd.**

Rebadged technology services provider said to be worth \$11 billion.

<https://www.zdnet.com/article/dimension-data-ntt-communication-and-ntt-security-bundled-into-ntt-ltd/>

Japanese telco giant NTT has created a new technology services arm, dubbed NTT Ltd, made up of its Dimension Data, NTT Communication, and NTT Security businesses.

The company said the new entity **will be worth \$11 billion**, employs over 40,000 people in 57 countries, and already has 10,000 clients.

In total, **28 different brands will be melted down into the new entity**.

"When we combine the **new capabilities of NTT Ltd along with NTT Data, we create a top five global technology** and business solutions provider with **\$20 billion revenues outside of Japan**," President and CEO for NTT Corporation Jun Sawada said.

The new entity **will be headquartered in London**, with Sawada adding it was a deliberate choice.

What do you think it's going to be like for your kids five years from now?

Sabrina refers to the paper by the Faculty of Engineering and Architecture titled, "Signal processing using photonic reservoir computing: optical form conversion."

Advanced signals processing, that's how we're doing all this. We're playing with the electrical body part [your aura] and we're changing the ways your cells literally **electrically orient themselves** in your body **and how they take biological instructions**.

We have a population of "sitting ducks" and they're not just sitting randomly somewhere. They're sitting inside of a "Kill Grid" [aka your home], a "Kill Web" [see JADC2 and the Kill Web], inside a "Kill Box" and they've been forced since COVID to stay in their Box and not leave their house for how many years now?

...they can't even feel their body part that you all have laced up with "Tasers." I don't see anybody telling the truth and we can do better.

+++++

9/25/2023

**Answering another excellent query- "Why wouldn't a way to stay human be made available?"**

<https://odysee.com/@psinergy:f/trim.AA0CDAAC-890F-4D0D-9B34-B7F7CC167E92:4>

At about 24:05 Sabrina mentions the Rybberg measurements for DOE. The correct spelling is Rydberg! Once they have everyone's DNA, Sabrina said this whole situation with the morphogenetic field [your biofield]--MORPHO-CEUTICALS [treating your field remotely, involving Rydberg atom sensors] isn't just Electroceuticals WE WANT TO BE ABLE TO **COMMUNICATE WITH** AIR MOLECULES around us [your biofield]--ATOMS THAT ARE SPECIFICALLY PLACED IN THE AIR *FOR US* AS TRANSHUMANISTS. Oh yeh, with the Rydberg atom I talked about last Halloween.

Approved in August 2021 Amazon shipping services were given the ability to route and run data right through you just to get your packages to your door faster.

Everyone will be connected—we already are with the biosensors.

This is wireless tissue engineering; this is morphogenesis; they radiate, accelerate... since the 60's.

Optogenetics is going to turn things on and off inside of you. You gotta go back and listen to Dr. Lindsay...

Why? Transhumanism. What are they going to do now? Well I don't know; I'm sure they'll want to turn everything off and let people have a choice now that they took all of our choices as much as possible and left us with God and our biofield.

NOTE: Rydberg atom sensor are used for many things and for traceable voltage measurements.

Rydberg radio frequency technology augments [makes greater] traditional Radio Frequency performance and creates fundamentally NEW CAPABILITIES IN RF SENSING, measurement, and IMAGING that are ... IT'S A HIGH TECH FIELD PROBE WITH Rydberg ATOMS THAT SURROUND PEOPLE.

These PROGRAMMABLE Rydberg atom-based SENSORS have far-reaching capabilities, ranging from SI-traceable measurements to receiving communication signals:

Rydberg Engineering: Recent Techniques for Sensitive Field Measurements Published - February 9, 2023  
Author(s) Drew Rotunno, et al.

<https://www.nist.gov/publications/rydberg-engineering-recent-techniques-sensitive-field-measurements>

Abstract

Highly-excited Rydberg atoms have been used for International System of Unit (SI)-traceable radio-frequency (RF) electric field and power measurements,...

Each of these methods helps increase sensitivity of atomic electric field measurements, to the point **where they have enabled wireless live video reception**. Taken together, they demonstrate the many opportunities in Rydberg engineering for refining measurements.

Here's a short video on Rydberg atoms.

<https://www.youtube.com/shorts/ydJZwPKJb7g>

This is a unique intriguing type of atom that occurs when one of its electrons is in a highly excited state... This atom is susceptible to external ELECTRIC AND MAGNETIC FIELDS. These atoms have wavelengths in the visible or RADIO FREQUENCY range due to their large electron orbits. They deal with the Quantum world and its technical applications.

2024 Airships for living library. What does Sabrina mean by this?

### **Airship: A New Front-End Library for Location Intelligence Apps**

One of several exciting announcements coming out of [CARTO Locations Madrid](#) was the launch of [Airship](#) CARTO's new front-end library **for Location Intelligence apps**. Airship along with [CARTO.js 4.0](#) and the new [Developer Center](#) is a part of CARTO's strategy **to empower developers with the tools to build their own custom Location Intelligence applications** and solutions to answer today's varied and complex business questions.

**With this library** designers and **developers can generate** styles **interactive elements typography** and many more design elements **optimized specifically for location applications** with minimal coding requirements. The library is build with [Atomic Design](#) in mind and as such consists of many independent and reusable components that can themselves be combined into more advanced components.

[2025 Nowhere to hide]

**CARTO—Connect it all—SMART phones, sensors, satellites, connected cars, drones; LOCATION DATA is changing the way we live and the way business happens. CARTO is *the platform* that turns location data into better BEHAVIORAL MARKETING... and much more...**

[What is CARTO? Discover the world's leading Location Intelligence platform](#)

<https://www.youtube.com/watch?v=4hoU2vNI6wE>

38,493 views 4 years ago

From smartphones to connected cars, location data is changing the way we live and the way business happens. CARTO is **the platform that turns location data into more efficient delivery routes, better behavioral marketing**, strategic store placements, **and much more**.

**[Big money can be made—after all it's a JOB]**

**Everyone**, from Business Analysts to Developers and Data Scientists, **use our Location Intelligence platform** to understand where and why things happen, optimize business processes, and predict future outcomes.

**CARTO can predict FUTURE OUTCOMES in 5 PHASES.**

Comment under video:

I completely missed the “bus” on uranium used to facilitate communication. Has found how uranium easily “slips through” the blood brain barrier and then wreaks havoc on the brain physiologically and cognitively but didn’t understand this is also a vector of communication. Thank you for taking the time to guide us still Sabrina. I’m working triple time cognitively to understand the “defining terms” of our current paradigm.

+++++

Why piloerection can save your life besides it is your own immune system in action [Sep 26, 2023]

<https://odysee.com/@psinergy:f/trim.D255B2CA-E336-489C-87B3-1B71A9A95D7E:d>

[9:40] Sabrina: The biofield is a body part. We generate photons from within our body that *propagate* on a DNA *wave*. I’m over simplifying so people don’t get lost in the weeds. We have a circulatory system that’s tethered to that same bioelectric body part [biofield] and 80% of our immune system is the biofield.

Nobody ever needed a *direct connection* to your bone marrow for “national security.” [It’s] Human husbandry.

+++++

9/29/23 Wban, biosensors and netcentric warfare w/signs

<https://odysee.com/@psinergy:f/trim.ABDDD55F-1DCE-43D4-9703-29F2765C421C:7>

[9:15] I don’t think you understand that they walk up next to you and *use your aura* to send a signal *into you*. Your aura is a body part; it’s connected to your circulatory system all of the time. Think of it as a remote to your central nervous system. Biosensors have been out there commercially since 2005.

So walk up to you, they have a nano peer-to-peer something that looks like a FitBit—that’s HUGE by the way; they don’t need all that; they

- Could be having an ingestible inside of them that changes their muscle strata to project a signal.
- They might have *special* biosensors that go in the Radiance chipset that’s imbedded in the left hemisphere.
- They might be able to just hook into the ubiquitous metaverse with a temporary augmented reality relay.

The Wireless Body Area Network (WBAN) is running computer game theory through it. How?

With specialized routing protocols not just for the wireless body area network, but for all your MESH relays as well; quality of service, temperature aware, etc—and all of these [pointing to display] that are checking back and forth to make sure that your precision Artificial Intelligence healthcare works. And **all it needs to do is get an electrical signal into your tissue. How?**

[11:25] **By swelling and de-swelling the air molecules around you electrically for voltage in your cells, permeate the membrane and make the biophysical optical tweezer change.**

NOTE: Rydberg atom sensor are used for many things and for traceable voltage measurements.
--

[12:00] So **in order to hit all those internal organs differently** and make sure that we only want to effect the lungs or the stomach the wireless body area network has a ton of “Routing Protocols” that specify between those little mesh relays exactly what to do (since 2007).

Etc.

How did I sign up for this? I didn't want to kill the rest of your neighbors as you were told there was a "pandemic", so I ran out there and got "graphinated" [CoV-injection] so that my computers could more easily send the signals from my precision artificial intelligence healthcare, and my Optogenetics and my ultra Wi-Fi VLC is on the way.

I go down to my *truck stop* and just try to get a coffee in the morning and here's all these "purple" lights everywhere, but heh, purples' a pretty color.

[14:38] Rutgers University is running all these different samples [experimenting with biosensors] between their college students and testing things, testing ROUTING [through their bodies].

Etc.

[15:13] The Global Information Grid, you're not getting out of it as the Grid is made of your DNA, reporting on your body area network (BAN). When it reports on your body area network to ALL those different relays...

**Your body is the new network and has been this whole time.**

[16:00] Sabrina explains a display of Enzymes for nano-biosensing for the detection of small molecules, and the different types and capabilities. Some of the biosensors

- have their own "operating system;"
- some have the ability to reach out to special air molecules;
- some of them have the ability to do brain-to-brain; or just
- neuron-to-neuron; or to
- many brain-to-one brain

Etc. We have a lot more metamaterials bouncing around and it's not because of towers, it's because of your new COVID [network architecture].

Etc. They will be running radio frequency directly through the body.

[18:00] We're energy harvesting through the body. You will power your coffee pot [with your brain].

Sabrina discusses the 6G Cognitive Radio Network (CRN) and this Research Article:

**Sixth Generation (6G) Cognitive Radio Network (CRN) Application, Requirements, Security Issues, and Key Challenges** (Aslam et al, 2021)

<https://downloads.hindawi.com/journals/wcmc/2021/1331428.pdf>

...upcoming 6G CRNs will trust **novel** empowering **technologies**. Innovative network architecture and transmission technologies and **air interface** are **of excessive position, like** multiple accesses, waveform design, multiantenna technologies, and channel coding schemes.

6G is decentralized, intended, intelligent innovative, and distributed network.

4.3. Information **Transfer of 5 Human Senses**. To experience the world's surroundings, there are five human senses: sight, touch, hearing, smell, and taste. **These five senses received data will be remote transfer in 6G CR network communication**. The neurological process **by sensory integration is used** in this process that **detects sensation from the environment and the human body and** effectively uses the body in the atmosphere and local environments.

4.4. CR Brain-Computer Interaction (CR-BCI). **BCI controls daily used appliances** in innovative societies, **specifically medical systems and home used appliances**. It represents **direct communication between external devices and the brain**.

4.5. **Healthcare**. Medical technology will benefit from 6G CR technology because innovation in **VR, XR, MR, AR**, mobile edge **computing, telepresence, holographic, and artificial intelligence will assist** in building intelligent healthcare systems. In the healthcare system, **a satisfied remote-control system will be served by**

**6G technology.** With the use of 6G technology, **there is the possibility of remote surgery.**

Sabrina says they'll be doing laparoscopic surgery from a drone over your home. How? Since 2012, we slap on an EEG headset with netcentric warfare [see DARPA surveillance system uses EEG for image filtering Sept 2012 and SOSA.]. We can do anything that we want *through your body*.

4.6. Haptic Communication in CR-Network.

4.7. Internet of Everything (IoE). IoE is **autonomous** coordination and **unified integration** [CONNECTING IN ONE WORLD ORDER STYLE] among many elements (computing elements), people, objects, devices or sensors, and the internet using data and processing.

At the same time, IoE presents an **intelligence network to gather all physical objects, data, processes, and people in a single system.**

AND MUCH, MUCH MORE... GO TO PAGE 8 AND CONTINUE READING.

Sabrina says you have two radio frequency "sinks" in your body (your heart and bladder area). **The "sinks" pull the radio frequency from other nodes in body on 802.15.4 and .5, respectively depending on what they need to be doing.**

**We ROUTE thermal dynamic routing THROUGH THE BODY since 2013.**

**We have K-HOP nearest neighbor routing body-to-body since 2007.**

**We have "open, shortest path first available" as well as intermittent link state routing on the 802.15.5 which are your mesh relays around the body since August 2021 when Amazon shipping was given ultra-wide band radio frequency access to all Body Area Networks in order to ROUTE data throughput faster *THROUGH THE BODY*.**

**IT'S NOT A VACCINE IF IT REQUIRES GRAPHENE  
because they are USING YOUR BODY AREA NETWORK  
a/k/a YOU AND YOUR DNA  
to ROUTE DATA [through YOU]**

**YOU ARE THE NETWORK.**

**YOU ARE A NODE ON THE NETWORK.**

Why does this matter? Cybersecurity...6G LoPAN (PAN = personal area network). A 6G PAN is the same radio frequency IEEE and that is 802.15.6. 6G LOPAN is 802.15.6.

**Again:**

**6GLoPAN encryption for the NEW DIGITAL ID and jumping states and getting away with it. THE DIGITAL ID IS IN YOUR BLOODSTREAM DOWN TO YOUR BONE MARROW WITH NANO TECHNOLOGY** according to articles and with universities in Indonesia, India and here in the US.

**6GLoPAN uses the human body in the BODY AREA NETWORK (BAN), BUT THEN TRANSDUCES THE DATA FOR THEM USING ELECTROMAGNETIC CONDUCTIVITY IN THE HUMAN BODY--piezo electricity, semantics, photonics and cinematics.**

It's piezo-electric harvesting out of your bones. **It transmits inside packets in the wireless right out of your bone marrow right out of your red blood cells, and right into joules that are then powering the 6G LOPAN in the green energy.** They use the sequence with the 5G.

How do they hurt people? They kill you with a bioweapon based on your DNA-based body part [your aura]. That signal that's coming in that they claim is off of a tower, they're lying; it's **[the signal is] going to come into your Personal Area Network (PAN)**, it's going to **select two of you humans** who have the fastest routing pattern **to protect the encryption on the striker unit** that is using electromagnetic warfare **to dodge a drone or** to prevent a drone swarm coming in.

+++++

Psinergist funnies 10/5/23

<https://odysee.com/@psinergy:f/trim.29C5931C-0F50-4B8A-BED3-B8B1ACAB0166:8>

[8:45] Neuromodulation, what's that? Well that's where we download a signal with all these big ass satellites and bio-frequencies that are DNA-specific and then distribute the rotation of software with DNA sequencing to control humans with the same massive (?) magnets and systems and databases.

We have been connected to the Cloud since 2014.

+++++

Wow, the below video was created in 2012 and even discusses signals "reflecting" off our bodies. Wow, this is very important information. It really reveals how in 2012, they were gearing up already and using our bodies as experiments and they KNEW THIS TECHNOLOGY WOULD RAISE THE TEMPERATURE IN OUR BODIES, so they were even trying to route THE FRICKING SENSORS already in our body around so it wouldn't heat up our body, and the experiment continues to this day, now high tech and transhumanism. OH WOW, IT JUST HIT ME THAT THIS IS COVID, THEY EXPERIMENTED WITH THE amount of computing they did in our bodies as the more computing, THE HOTTER THE NODES [HUMANS] BECOME.

The power they are going to be using us for--as computers and routing data in and out of us that is--will be super harmful as explained below [as of 2012].

OMG...just like a SMART meter, YOUR BODY'S DATA IS TRANSMITTED FROM sensor to sensor to sensor to RECEIVER--THE BLOODY GRID.

BODY AREA NETWORKS [2012]

<https://www.youtube.com/watch?v=12Rwzwcw4bS0&t=12s>

At 35:15: [I don't know why he uses past tense here] Non-RF (radio frequency) Communication There are other ways they try to transmit information. This Non-RF Communication [Body-Coupled Communication BCC], what they wanted to use is passive and galvanic coupling.

We all know we have this "galvanic" response IN OUR SKIN. They wanted to transmit the information THROUGH THIS MEDIUM [OUR SKIN].

So the "frequency" of doing that ranges between 10 kHz to 10 MHz. There could be interference in this case between the signals that YOU HAVE and low power data communications.

The WAY that you would EXCHANGE information is you could shake hands with someone and the information WOULD TRANSMIT BETWEEN THE TWO PEOPLE. [WOW].

It has a very low data rate, and the reason it has a low data rate IS BECAUSE THE AMOUNT OF "NOISE" IN the signal.

WOW....

36:20 PROTOCOLS He states there's a NEW PROTOCOL COMING which is IEEE 802.15.6 [remember this is 2012]. This is a new WIRELESS protocol that is being designed specifically FOR BODY AREA NETWORKS. IT'S LOW POWER; the reason being you can't stick anything HIGH powered on the body due to the possibility THAT THOSE RADIO WAVES are GOING to MORPH THE MATERIAL--THE TISSUES of the BODY--INTO SOMETHING CANCEROUS OR TUMOURS and THAT'S BEEN A REAL PROBLEM WITH CELLPHONES.

Then he states ZIGBEE is NOT the best solution for WBAN [I think Sabrina states they do use Zigbee and Bluetooth; they don't give a shit about us.]

37:16 The PURPOSE of the IEEE 802.15.6. [Oh he doesn't go into this and quickly goes to the next slide, but if you read the slide, interesting.] From what I gather:

The purpose for this "international" standard is for SHORT RANGE--WIRELESS network [5G/6G] to pick-up YOUR BODY'S BIOFIELD READINGS and they could COMMUNICATE TO AND FROM YOUR BODY. BUT THESE

SIGNALS HAVE TO BE IN CLOSE PROXIMITY TO YOUR BODY OR INSIDE YOUR BODY--they already are!!! Just think when 5G/6G gets installed in your neighborhood--that's SHORT RANGE AND IN CLOSE PROXIMITY TO EVERYONE'S BODY. It will be utilized to communicate to and from our bodies! Wow.

The slide reads:

The data rates into and out of our body currently are up to 10MBps.

[THIS IS New Technology to Use Human Body As Digital Transmission Path----It's fudd-rucking OLD now 2005]

<https://phys.org/news/2005-02-technology-human-body-digital-transmission.html>

Feb 22, 2005 ... Nippon Telegraph and Telephone Corporation (NTT) is pursuing research and development of an innovative Human Area Networking technology ...

Oh hell, let's jump to 2022!!!

An Energy-Efficient and High-Data-Rate IR-UWB Transmitter for Intracortical Neural Sensing Interfaces

[Minyoung Song, et al, 2022] <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7614137/>

This paper presents an implantable impulse-radio ultra-wideband (IR-UWB) wireless telemetry system for INTRACORTICAL NEURAL SENSING interfaces [for BRAIN-COMPUTER INTERFACING]. A 3-dimensional (3-D) hybrid impulse modulation that comprises phase shift keying (PSK), pulse position modulation (PPM) and pulse amplitude modulation (PAM) is proposed to INCREASE MODULATION [PULSING] order without significantly increasing the demodulation requirement, thus leading to a high data rate of 1.66 Gbps and an increased air-transmission range. OPERATING in 6 – 9 GHz [6G TO 9G, REALLY?] UWB band, the presented transmitter (TX) supports the proposed hybrid modulation with a high energy efficiency of 5.8 pJ/bit and modulation quality (EVM < -21 dB).

What happened to MORPHING OUR TISSUES of OUR BODY INTO SOMETHING CANCEROUS OR TUMOURS?

Are we screwed? Yes, my darling; I could hear Sabrina saying this (hee hee?).

What happened to SAR compliant (below 10dBm ON SURFACE] get it--ON SURFACE, NOT IN? REALLY?

He says, ENCRYPTION IS A MAJOR PROBLEM WITH ALL OF THESE THINGS. I DON'T THINK the solutions they've been PROPOSING are really ones that are "implementable." Mainly because of the amount of the more computing that you do, THE HOTTER THE NODES [HUMANS] BECOME and so YOU NEED MORE POWER. That's A VERY, VERY BIG PROBLEM. Speaking of POWER, AS YOU INCREASE THE POWER, THE NODES get HOT, and when the NODES GET HOT, THAT'S NOT A GOOD THING YOU WANT TO HAVE ON [and in] YOUR BODY. [Elementary my dear that we are screwed. You know the money hungry bastards will want more computer into and from our bodies.]

So they've come up with an ADAPTIVE "LEAST TEMPERATURE" ROUTING---[routing data in and out of your body]. He says, "TO ME THIS IS REALLY GRASPING AT STRAWS; I THINK THEY'RE trying EVERYTHING TO TRY TO REDUCE THINGS" [the temperature, my darling, in your body my darling===in your kill box].

[OMG...just like a SMART meter, It's sensor to sensor transfer of data from your body]:

He says, "But what they're doing is, if you have THESE SENSORS... AND EACH ONE OF THESE SENSORS will PICKU UP "INFORMATION" FROM A NEARBY SENSOR then TRANSMIT THAT TO IT'S NEARBY SENSORS [already in your body], those sensors. Those SENSORS PICK IT UP AND TRANSMIT TO THE NEXT "SET" OF SENSORS [including cellphones] and THOSE SENSORS THEN TRANSMIT IT TO the RECEIVER [THE BLOODY GRID] which then uses it for some purpose."

Some NODES [humans] are hotter than others (low and hot nodes)...so there's a problem he says as the SENDER transmits data [or frequency?] to a low temperature node, since the node right next to it is HOT, so it gets sent any direction they please to get to their "destination." So there can be significant delays associated with it....

They are routing data or frequency recklessly through nodes to get to their "victim"?  
YOU CAN USE A HOT NODE.... YES MY DEAR, YOU CAN BE A HOT NODE, but they haven't described yet how or which nodes are HOT.

Lying down and sleeping and trying to "wear" these sensors are really a big problem that needs to be solved if they're going go in this particular direction OF USING RADIO FREQUENCY SYSTEMS that are currently available. [ya think?]

BAN (Body area Network)

Security? How are you going to secure it?

POWER? How are you going to control the power? Where's the power going to come from? Power from outside (antenna/SMART meter/5G/6G?) Muscle energy or mechanical energy from the body to examine how things could be added to the "system." These systems are using more power than we can actually generate, so we always end up having to wear some kind of battery pack of some kind in order to power everything--- [meaning power for your body to computer.]

HE SAYS, "And THE FACT THAT WE ARE RADIATING INFORMATION, literally, [that] WE'RE RADIATING INFORMATION, MAKES THIS A SEVERE PROBLEM FOR WHETHER IT'S SAFE OR NOT. WHETHER THE PERSON WEARING IT THINKS IT'S SAFE. That's really an issue... If people will consider it safe.

New word of the day: Cyberphile

+++++

### EV-I-LUTION PART I

<https://rumble.com/v3pra1j-ev-i-lution-part-i.html>

At 58:30 Just **inject** into people the knowledge "they" wish you to have. [That's funny, I thought they wanted us "dumbed down."]

Yes, first he talks about animals, then in the next breath, he talks about HUMANS and the human BRAIN. From the human drone standpoint, you can attach one human brain to another human brain; Does this REALLY MEAN IS ATTACH A HUMAN BRAIN TO A DRONE, and then direct motor activity, or send info from brain to machine (AI learning), or machine to brain?

He compares Dr Ventner's work to Nuclear Weapons! HE CREATED LIFE IN A CELL, MEANING, the CELL CAN produce:

perfume,

petroleum,

PEPTIDE--anything THEY PROGRAM THE DNA TO DO [produce]; AND

it's "IN" the living cell.

[This is the VAX, THEY EXPERIMENT WITH HUMANS known as ANIMALS, NODES, OR JUST PLAIN NOTHING-BEINGS.]

THESE CAN BE INSERTED INTO YOU VIA INJECTION NEEDLES. You

- Put in a SPECIFIC GENE SLICING,
- YOU PROGRAM WHAT YOU LIKE,
- YOU PUT IT IN A CELL, AND
- IT CAN REPRODUCE, and

- you make as MUCH AS YOU LIKE.

[Kill some, harm some, transhumanism some, whatever THEY like and to whoever they like.]

59:10 Just send a signal and tell WHICH PORTION OF THE DNA SHOULD UNRAVEL or UNFOLD AND PRODUCE THE PRODUCT.

Then we have DESIGNER RECEPTORS THAT CAN BE REMOTELY CONTROLLED. YOU CAN CREATE A CELL, YOU CAN PUT IN SOMEWHERE IN THE BODY, AND YOU CAN REMOTELY ACTIVATE IT

As long as you KNOW A PERSON'S DNA SEQUENCE, YOU CAN DESIGN ANYTHING IN THE PERSON!!! JUST INJECT IT AND ACTIVATE IT REMOTELY AND CONTROL IT.

Don't worry, it may affect the way you think, the way you act--JUST EDIT, SPLICE AND PROGRAM A CELL. JUST PARK IT--A LOADED CELL--ANYWHERE YOU PROGRAM IT TO GO, THEN IT WILL PROLIFERATE

They've figured out HOW TO HIDE IMAGERY IN THE DNA OF BACTERIA. They could have the INFORMATION reproduced in a string form AS A FORM OF A PROTEIN [DOES SPIKE COME TO MIND?].

The NEW way to HIDE INFORMATION WILL BE IN DNA. The speaker shows an IMAGE IN WHICH YOU CAN HIDE BACTERIA. China is merging DNA systems WITH QUANTUM COMPUTING.

"This will be both an amazing AND LETHAL THREAT.

Next, can we erase, modify and/or change memory? "The short answer is, YES."

(This article **belongs to the Special Issue Body Sensor Networks** for Healthcare and Pervasive Applications)

Introduction

**Intra-body communication (IBC)** is a technology that involves using the human body as a transmission medium for electrical signals [1]. Compared with the current short distance wireless communication technologies, such as Bluetooth, Zigbee and so on, IBC has the characteristics of high transmission quality, high security, easy network access and high data rates, etc. As a result, IBC technology is proposed as a novel and promising technology **for Wireless Body Area Networks (WBANs)** [1,2], **biomedical monitoring** [3,4] and **supplying power for implants** [4], etc. On the other hand, **galvanic coupling IBC** is an important approach to **achieve the signal transmission within the human body** [5,6]. In this approach, signal transmission is achieved **by coupling signal currents galvanically into the human body**. The electrical signal is applied over a pair of transmitting electrodes and thereby **establishes an electrical field**, and then it is received by the receiver over

a pair of receiving electrodes. Compared with the other types of IBC, the signal transmission quality of the galvanic coupling IBC is not influenced by the individual's surroundings [6,7]. Meanwhile, miniaturized electrodes can also be used in this approach, therefore, galvanic coupling IBC is presented as a promising approach for data communication within the human body.

[Sabrina states there are two sinks in the body—the heart and the bladder.]

### An Overview of Intra-Body Communication Transceivers for Biomedical Applications

<https://www.irma-international.org/viewtitle/112359/?isxn=9781466658882>

Seyedi et al.

The main objective of this article is to present a review on a new wireless communication technique that, recently, has gained attention for its reliability and energy efficiency. Intra-Body Communication (IBC) or Body Channel Communication (BCC) is a novel non-RF wireless data communication technique **using the human body itself as the communication channel or transmission medium with transmission power below 1 mW and data rates of more than 100 kbps** (Wegmueller, Oberle, Felber, Kuster, & Fichtner, 2010). In this communication method **human body acts as conductor to transmit all or a major portion of information data between sensors** attached on or implanted [vax] in the body and hub **node** (Figure 1).

IBC can be classified into two basic procedures based on how data is transmitted through the body: (a) the capacitive coupling (electric field) method and (b) **the galvanic coupling (waveguide) method**. In the capacitive coupling method, **the induced electrical signal is capacitively coupled through the air or the ground**. This method is also known as the near field effect. The **galvanic coupling method achieves signal transfer by injecting alternating current into the human body**. In this method, **the human body becomes a transmission line or waveguide**.

In the both coupling methods, **the induced AC current to the human body must be below 1 mA**. Therefore, the induced current is 20 times below the maximum allowed contact current based on the exposure guidelines of the international commission on non-ionizing radiation protection (ICNIRP, 1998)

Because **there is a variety of cell types and cell distributions inside a tissue, the microscopic description of the response is highly complicated**.

+++++

Oddly, these professors and other “entities” **name their sensors and projects with FAMOUS WAR OPERATION names**.

The RIMOR bio-nano sensors will be called **GLADIO** (with SENSOR-INTERFACED CIRCUITS).

The term '**GLADIO**' refers to the **clandestine stay-behind networks** in Western countries created after World War II to counter a possible Warsaw pact invasion through demolition, resistance, and sabotage. **Some members of these networks, in Italy and Belgium for example, were suspected of criminal and far-right contacts and even participation in right-wing terrorist acts.** Some writers claimed a **NATO-coordinated conspiracy** to prevent left-wing forces from rising to power in Western Europe. These 'scandals' were investigated in parliamentary inquiries and before the courts. While **criminal activities certainly happened on the fringes of some SBOs, a NATO conspiracy was never proven.**

Source: <https://journals.sagepub.com/doi/pdf/10.1177/0968344520914345>

**NATO's Secret Armies: Operation Gladio and Terrorism in Western Europe** (London: Cass, 2004),

D. Ganser

The story of NATO's secret anti-communist stay-behind armies that had been set up by the CIA and MI6 after World War Two in all countries of Western Europe and in some countries became tragically linked to right-wing terrorism and politics to this day.

At the time of the **Gladio** discoveries in 1990, **NATO**, the world's largest military alliance, was made up of 16 nations: Belgium, Denmark, Germany, France, Greece, the United Kingdom, Iceland, Italy, Canada, Luxemburg, Norway, Portugal, Spain, the Netherlands, Turkey and the United States, with the latter commanding a dominant position within the alliance. **NATO** reacted with confusion to the revelations of Italian Prime Minister Andreotti and **feared for its image when the secret stay-behind armies were linked to massacres, torture, coup d'etats and other terrorist operations** in several countries of Western Europe.

'Secret NATO network branded subversive: Commission finds that **Gladio**, the alliance's underground arm in Italy, became a focal point for fascist elements bent on combating the Communists by **instigating terrorist attacks to justify repressive laws.**'<sup>5</sup>

Worner confirmed that the military command of the allied forces – Supreme Headquarters Allied Powers Europe (**SHAPE**) - coordinated the activities of the "Gladio Network", which had been erected by the secret services in various countries of NATO, through a committee created in 1952, which presently is being chaired by General Raymond Van Calster, Chief of the Belgium military secret service', later revealed to be the ACC.

Everybody knew that if for an operation he lacked an expert in explosives or in telecommunications or in repression, he could without problems address another country because the agents had been trained in the same techniques and used the same materials.'<sup>33</sup>

While the debate concerning the existence or non-existence of a 'secret government' in the United States continues, the **Gladio evidence shows that the CIA and the Pentagon have repeatedly operated outside democratic control during the Cold War, and also after the end of the Cold War remained unaccountable for their actions.**

Journalist Arthur Rowse, formerly on the staff of the Washington Post, thereafter in an essay on Gladio in Italy drew 'The lessons of Gladio': '**As long as the US public remains ignorant of this dark chapter in US foreign relations, the agencies responsible for it will face little pressure to correct their ways.** The end of the Cold War', Rowse observed, 'changed little in Washington. **The US...still awaits a real national debate on the means and ends and costs of our national security policies.**'<sup>47</sup>

While the British executives and MI6 refused all comment, Conservative Party member Rupert Allason, editor of the Intelligence Quarterly Magazine under the penname Nigel West and author of several books on Britain's security

services, at the height of the **Gladio** scandal in **November 1990 confirmed** to Associated Press in a telephone interview that **'We were heavily involved and still are...in these networks.'**

#### Conclusion

#### **"Prudent Precaution or source of Terror?"**

**Totalitarian** states have long been known to have operated a great variety of largely uncontrolled and unaccountable secret services and secret armies.

Such an environment of fear, as the Gladio evidence shows, is ideally suited to **manipulate the masses on both sides** into more radical positions.

Furthermore also **more high-tech** - from retina scanning to smart containers - **seems unable to really protect potential targets from terror attacks.**

Book found in .pdf here: [https://files.libcom.org/files/NATOs\\_secret\\_armies.pdf](https://files.libcom.org/files/NATOs_secret_armies.pdf)

#### **Wikipedia:**

The **Supreme Headquarters Allied Powers Europe (SHAPE)** is the military headquarters of the [North Atlantic Treaty Organization](#)'s (NATO) Allied Command Operations (ACO) that commands all NATO operations worldwide. SHAPE is situated in the village of Casteau, near Mons, Belgium.<sup>[1]</sup>

**With Norway's help in funding, the project was called CLIQUEUS IoBNT.**

Oddly in the same paper above regarding GLADIO, is CLIPEUS is mentioned:

**British plans to develop and deploy their own nuclear demolition devices, BLUE PEACOCK, and 'Project CLIPEUS'** were abandoned in 1958 and the 1970s, respectively. 76

**Project CLIPEUS: atomic demolition munition**, DEFE 19/66, The National Archives, Kew (NAK), available at <http://discovery.nationalarchives.gov.uk/details/r/C1196935>; and Wither, 'Alem el Halfa', p. 30

Accordingly, **by 1971 the UK** appears to have been moving ahead **with its own ADM programme** with a primary focus on NORTHAG requirements. **This was designated 'Project Clipeus'**.6

From the outset NORTHAG had also counted on an additional **secret force of civilians who would conduct a mixture of intelligence reporting, sabotage and demolition work.**

He repeatedly **emphasised that to 'pay the highest possible dividend such an organisation should be German manned'**.70 By the end of the 1950s such an organisation had come into being. **Often referred to by its code-name 'Gladio' it was controlled by the Allied Clandestine Committee at SHAPE and was active throughout the Cold War.**71

**NORTHAG certainly enjoyed its own significant sigint and electronic warfare capability.**

**This was worrying because electronic warfare was one of the few planned intelligence sources for determining the location of enemy headquarters.**

**Internet of bio-nano things (IoBNT) is a novel communication [2021]**

<https://rubble.com/v1rm820-internet-of-bio-nano-things-iobnt-is-a-novel-communication.html>

**Bio Cyber Interface** translates biochemical signals from IN-body nanonetworks into electromagnetic signals and **vice versa** [can translate electromagnetic signals into biochemical signals FROM INSIDE THE BODY, out?]

**Note:** The Bio Cyber Interface has COMMUNICATION features and one of its keywords is Parameter PROFILING.

Fast [5G/6G?], low-cost and simple; the main concern is the security, why? **“Once the human body is accessible through the internet, there is always a chance that it will be done with malicious intent.”**

What security is “proposed?”

A framework **that utilizes Particle Swarm Optimization (PSO) algorithm [AI] to optimize Artificial Neural Networks (ANN) and to detect anomalous activities IN the IoBNT [bio-nano sensors in you].**

+++++MORE ON CLIPEUS and GLADIO+++++

**Fine-grained manipulation of man-kind. Forcing injections, forcing mandates spell out an evil plan in evil hands.**

**NOTE HEREIN:**

**Our ability to miniaturize sensors and electronics is unprecedented, and our understanding of biological systems enables fine-grained manipulation of cellular behavior down to the molecular level.**

**CLIPEUS** (Shield in Latin) **aims at creating a communications network** among **man-made implantable devices and the natural cells** inside the body **under the novel communication paradigm, called Internet of Bio-NanoThings**, where sensing, actuation, and computing processes are tightly coupled to pervasively, **perpetually, and precisely sense, process, control, and exchange health information of the body in real time** to defend it against infections.

**CLIPEUS focuses on the detection** of infections inside the body **based on the detection of the molecular communication** among the **infectious bacteria [GEO ENGINEERED] by man-made bio-nanotechnology, called GLADIO** (Sword in Latin), **consisting of bionanosensors for detection, low power electronics for processing and antenna for near field communication** to transfer the data [your biological data] **through the tissues to outside of the body.**

## **Internet of Bio-NanoThings for Prediction and Prevention of Infectious Diseases**

<https://prosjektbanken.forskingsradet.no/en/project/FORISS/310601?Kilde=FORISS&distribution=Ar&chart=bar&calcType=funding&Sprak=no&sortBy=date&sortOrder=desc&resultCount=30&offset=120&TemaEmne.2=IKT-n%C3%A6ringen>

**Awarded: NOK 16.0 mill.**

Source: [Research council of Norway](#) Project Manager: [Professor Ian Akyildiz](#) Project Number:

310601 Application Type: [Forskerprosjekt](#)

[Fornyelse](#) **Project Period: 2020 – 2025** **Funding received from:** [IKTPLUSS-IKT og digital innovasjon](#)

Under the **Molecular Communications-motivated perspective** of abstracting the problem of **early-detection of bacterial infections** as system with a clearly defined **sender (bacterial infection), channel (tissue) and receiver (Bio-Nano machine)**, the focus of research **conducted in 2022** was **set on the investigation of an bacteria-based Bio-Nano receiver/sensor.**

This sensor's integral component consists of **engineered bacteria** which are **genetically altered to sense** an analyte (e.g., Quorum Sensing signal/circuits or **bacteria quorum sensing\***) and in response **produce a measurable light signal through bioluminescence/fluorescence**. The intricate bio-chemical processes, from **molecule uptake into the bacterial cells** to the expression of bioluminescence (LuxABCDE) **genes which underly this process** need to be closely investigated to **derive reliable quantitative models** which describe and **predict a bacterial-sensor's response to a signal**.

**\*Bacterial Quorum Sensing: Its Role in Virulence and Possibilities for Its Control**

Quorum sensing is a process of **cell-cell communication that allows bacteria to share information** about cell density and **adjust gene expression accordingly**. This process **enables bacteria to express energetically expensive processes** as a collective **only when** the impact of those processes on the environment or on a **host will be maximized**. Among **the many traits controlled by quorum sensing** is the expression of virulence factors by pathogenic bacteria [including engineered bacteria].

Here we review the quorum-sensing circuits of *Staphylococcus aureus*, *Bacillus cereus*, *Pseudomonas aeruginosa*, and *Vibrio cholerae*. We outline these canonical **quorum-sensing mechanisms** and **how each uniquely controls virulence factor production**. Additionally, we examine **recent efforts to inhibit quorum sensing in these pathogens** with the goal of **designing novel antimicrobial therapeutics**.

To that end, mathematical models have been derived which are based on both literature study of relevant scientific publications in microbiology, and empirical data. These models consist of several differential equations following well-studied bio-chemical principles (General-Mass Action, Chemical Langevin, Michaelis-Menten kinetics) that **capture the time evolution of chemical substances** involved in the **reaction-cascade initiated by the target signal**, ultimately yielding an expression **for the resulting luminescence signal**.

...The **experimental data has been collected in a series of initial Wet Lab in-vitro** assay-based experiments which **resulted in time series luminescence data for various input concentrations of the target signal**. While **the initial project** description anticipated a focus on the **investigation of bacterial infections by the gram-negative *Pseudomonas aeruginosa* strain [pneumonia]**, considerations regarding feasibility, accessibility and based on expertise of the involved biologists, the attention of **the project was directed to the analysis of the gram-positive *Streptococcus mutans* strain** which can be found in the oral cavity of mammals and whose infections can lead to the host's tooth decay.

[Did the injected engineered bacteria cause Strep, pneumonia, e-coli and or multiple COVID outbreaks?]

...Furthermore, **particle-based Monte-Carlo simulations** capturing the stochastic nature of the **investigated molecule-based system** will be conducted. It is anticipated that experimental focus **will shift towards microfluidic set-up**, as these **allow for extremely precise observations of cellular dynamics with resolutions down to single-cell level**. The **integration of living bacteria into an actual physical nano-sensor** will be a further strong project focus in **2023**.

**Our ability to miniaturize sensors** and electronics **is unprecedented**, and our understanding of biological systems **enables fine-grained manipulation of cellular behavior** down to the molecular level.

**CLYPEUS** (Shield in Latin) **aims at creating a communications network** among **man-made implantable devices and the natural cells** inside the body **under the novel communication paradigm, called Internet of Bio-NanoThings**, where sensing, actuation, and computing processes are tightly coupled to pervasively, **perpetually, and precisely sense, process, control, and exchange health information of the body in real time** to defend it against infections.

**CLYPEUS focuses on the detection** of infections inside the body **based on the detection of the molecular communication** among the **infectious bacteria [GEO ENGINEERED]** by **man-made bio-nanothings, called GLADIO** (Sword in Latin), **consisting of bionanosensors for detection, low power electronics for processing and antenna for near field communication to transfer the data [your biological data] through the tissues to outside of the body.**

Due to the power limitations of GLADIO, the inherent noise of biological processes, and the non-deterministic response of patients to infections, the collected data will be sparse and noisy. **Novel machine learning techniques** will be developed **to interpret this data for future personalized medicine applications.** The system will be extensively tested and ameliorated [when something bad is getting better or being made better] by **phantom experiments as a first step before in vivo experiments.** The project will recruit and train 2 PhD students and 2 Postdocs and has drawn up a comprehensive, multifaceted plan to disseminate, communicate and exploit the project results.

+++++

This is lengthy, but if you read to the end, **you will understand how your “Physical Space” data gets sent to “Cyber Space”** and the **technical side of just what these bio-nano sensors do and how they do it.**

**They’ve planned these injections [of the bio-nano sensors] for many years.** The word **panacea** means “cure all” or answer to all cures.

**RIMOR** means “explore” and these are the BIO-SENSORS with interfaces (chips) in them. This is what they are doing, injecting (vax) the bio-sensors (RIMOR) as the “transmitter” and the receiver is the “target” or organ. **The bio-sensors they inject have a sensor “interface” readout chip in it and contain THREE different sensing units** of the Bio-Nano Thing (RIMOR); more on this below.

They are **using magnetic induction communication with the SKIN** to the Gateway (can be a tattoo device, band aid, e-watch); then it goes to your cellphone, e-watch, etc., (NEAR communication), then the cellphone/e-watch/etc. can USE the Internet Backbone to transmit to the Central Monitoring Station (doctors, clinics, etc.).

**This presentation was year 2020. He speaks about what they’re attempting to do with the INTERNET OF BIO-NANO THINGS (IoBNT) and injections.**

**BIO-NANO-THINGS & IN-VIVO NANO NETWORKS (Prof. Ian F. Akyildiz Lecture)**

<https://www.bitchute.com/video/yIM7EUoietCf/>

Start at 31:25 Look at the body figure at the head where the arrow goes out from the head (physical sensing) and a blue arrow goes from Cyberspace into the head (Actuation Information). These body sensors send out your body’s data to Cyberspace via cellphones or other sensors then to the CDC or CENTRAL MONITORING STATION, which could be China for all God knows.

(BNT) RIMOR means “explore” which ARE the BIO-NANO sensors (in the body). He actually says, “**which we will INJECT INTO THE BODY**” so they can monitor and they will have a program in which they can MONITOR diseases. Then he points out GATEWAYS from your body sensors, your e-watch sensor, your cell phone that go to the CyberSpace.

LOOK WHAT THE FIGURE, meaning **your PHYSICAL SPACE goes to CyberSpace:**

Machine Deep Learning (AI) to HANDLE all of your collected bio-data: Integration (Data), Storage, Processing, Transmission and Reception (of your bio data).

**And the Propagation Channel used is YOUR TISSUE WHICH IS the COMMUNICATION NETWORK.**

Then your bio-data goes to Big Brother (CDC shown here) and databases. They call the CDC Central Disease Control but could it be Central Disease processing TO THE BODY—GIVING THE BODY A DISEASE? After all the body can RECEIVE information in a digital format—a disease that has a certain frequency, no doubt; and keep in mind that drug delivery will be performed wirelessly in the future, treating you, your biofield and communicating to every organ it wants to.

[Our bodies are no longer our bodies as this is “cyberphile” that taking of our bodies through Cyber Space.]

[33:09] Framework of the “everything” Cyber-Physical System

Look at Thrust 1, 2, 3 and 4 (on the right) where each one has a TASK.

Thrust 1 = your physical body.

Task 1.1 = bio-nano sensors are the HARDWARE design.

Ask yourself, “What task are we in? “

Thrust 1 is the VAX. For sure we’re already past Thrust 1.3 which is Integration of the bio-nano sensors (RIMOR components) INTO the body.

As you read this, keep in mind, Panacea means “cure all or everything” and RIMOR means “explore” and are the bio-nano sensors.

Look at THRUST 4 entitled EXPERIMENTAL VALIDATION, it’s connected to each of the other thrusts, all communicating to each other.

Task 4.1: Testing of Individual components [your body components].

Task 4.2: Prototyping of the “cure all” inside your body.

This Task points to Task 2.3 Backbone communication with the Internet.

Thrust 2, Task 2.2: Near Field WIRELESS [all sensors and 5G pushing the data?] Data and power TRANSFER.

[This is the bio-sensors communicating to the Gateway, THEN FROM THE GATEWAY TO THE CELLPHONE/e-watches, etc., then to the BACKBONE communication with the INTERNET.]

Task 2.1: Modeling infection AND drug delivery. Does this really mean modeling infection delivery?

Task 1.2 The sensor-interface is a READOUT CHIP of RIMOR.

Thrust 3, Task 3.2: Deep Learning (machine, AI, algorithms) for DETECTION, early detection. Thrust 3 can be modeled for the communication aspect.

Thrust 4 during the entire experiment on the people, each TASK tests, prototypes and integrates every other THRUST and Task and oversees it.

The bio-sensors (Thrust 1) which are part of the Hardware, they communicate to the THRUST 2.

Again, the bio-sensors communicating to the Gateway, THEN FROM THE GATEWAY TO THE CELLPHONE, then to the BACKBONE communication with the INTERNET.

**Then you have the CYBER DOMAIN (Thrust 3).**

Task 3.1 Collection of your data

Task 3.2 Machine learning, AI, database of your data

Task 3.3 Then take action, deliver whatever they want to your body, or visualization of ?.

Task. 3.4 Secure your data; Blockchain your data? Data handling AND TRANSMISSION.

They have 5 professors and about 10 different people working on this.

36:17 Listen closely to one of the ways they deliver drugs by the physician REMOTELY using this INTERNET OF BIO-THINGS PLATFORM.

37:23 THRUST 2 Physical Domain – BIO-NANO thing/sensor called RIMOR

The bio-nano sensors measures QS communication, then the SENSORS interface—meaning processes your body's data and send it WIRELESSLY over MAGNETIC INDUCTION.

They are using magnetic induction communication with the SKIN to the Gateway (can be a tattoo device, band aid, e-watch); then it goes to your cellphone (NEAR communication), then the cellphone can USE the Internet Backbone to transmit to the Central Monitoring Station (doctors, clinics, etc.).

38:52 He explains **the technical part of the BIO-NANO SENSOR** which include three different sensing types or sensing units of the Bio-Nano-Things that we are PLANNING TO design and IMPLEMENT.

1. Electromechanical sensor = functionalized electrodes that **directly bind with quorum-sensing molecules**
2. [Electromechanical] Bacterial sensor (or sensing unit) and **engineered reporter bacteria produces an electro-active product** upon reception of the quorum-sensing molecules. This electromechanical **sensor generates currents** corresponding to the concentration of the quorum-sensing received. Then you can see a binding process in which they are received by the transducer (antibody).  
**[Reporter bacteria: E. Coli engineered to catalyze a chemical process to produce electroactive output such as antigens.]**
3. Bacterial sensor, an **engineered reporter bacteria produces bio-luminesces (photodiode) or fluorescents upon reception of the Quorum Sensing Molecules and they are "Excited."** The porous membrane [skin] has these "holes" and **these bacteria can HASH through [the skin] and the Bacterial sensors will capture them, then we apply these bio-luminesces (photodiode) or fluorescents and then a light sensor (photodiode) generates CURRENTS, which correspond to the concentration** of the quorum-sensing received [sensors report how many quorum sensing molecules in you].

What happens is **WE MAINTAIN LIVE BACTERIA INSIDE THE SENSOR** and [it's] difficult and the sensing process is noisy and that's one of our challenges. **Keeping the bacteria alive IN THIS SENSOR is our biggest challenge.**

41:30 Challenge 2. The **design of the readout chip** (the inductor in the sensor) **to process biosensor signals.** We use the magnetic induction. These are the **COIL ANTENNAS, THERE'S THE SKIN then on top of the skin**

**band aid type or tattoo thing has components inside, known as the EXTERNAL CONTROLLER CONSISTING OF a Power Amplifier, Demodulator and BLE Transmitter—a typical passive device that can receive [data] from the readout chip.**

Then you have the **Wireless Power and Data Transfers (WPT)**

**Coils to connect RIMOR (sensors) to, and for, wearable HUBS which are physical parts.**

### **Communication among IoBNT Components**

Data flows from the internal bio-nano sensor via a CURRENT to the Sensor Interface (readout **chip**) to wearables or cellphones, then to the GRID or Central Monitoring Station.

Thrust 3 components, we can model them for the communication aspect.

43:41 It's Transmission and Reception (of your bio data) and **the Propagation Channel used is YOUR TISSUE WHICH IS the COMMUNICATION NETWORK.**

The bacteria molecule sensors “come out” and move inside the body (**in and around cells/tissue**) and then the bio-sensors and readout chip (RIMOR) picks up the reception and processes it [to the CDC].

The **Channels are time varying** and **there's this diffusion process**. All these **bacteria are floating around within cells or between the cells** and they are shadowing by the tissue structures (channeling problem) and there are also multi-path effects.

**You can see we can also use them as MIMO type communication (5G/6G multiple in, multiple output)...**

46:04 **Controlled RELEASE OF QUORUM SENSING MOLECULES into the body type fluids FROM SYRINGE.**

**They did experiments where they inject quorum sensing molecules into a tube where the bio-sensors (RIMOR) will measure the molecules which were infected (ENGINEERED) or not infected, that's we're trying to find out. The bio-sensors send information to computer [CDC or ?] and it DISPLAYS THE VALUE and if the bacteria is infected or not infected [which means they measure the number of quorum sensor molecules in you.]**

[So they can read your body wirelessly through the GRID to another country? Keep in mind this was 2020. Was the vaccine created December 2020?]

This man states they started to experiment with MEAT—through the human body or skin where sensors communicate to a wearable HUB or to a cellphone to the computer.

**47:25 Rats were injected bio-sensors (RIMORs) and monitored: No infection. Sub-lethal dose. Lethal dose; and it worked.**

[Does this sound familiar? Which shot did you get?]

**Then they got funded (Nov 2020) with Norway's help and called this project CLIPEUS IoBNT. Award: NOK 16 M ~\$1.8 M (in 2021 for 4 years)**

Of course, now everybody talks about “diseases” right, about this virus, etc. Now a lot of people start to work on these issues, so **I've had these vaccine ideas for many years now.**

Although this is mostly bacteria based, RIMOR will **be called GLADIO (with SENSOR-INTERFACED CIRCUITS)**. **THESE WILL HAVE DIFFERENT DESIGN** and we need people.

We will work towards the virus case(s).

Isn't it odd they discuss pneumonia which has unique quorum sensing molecules?

He asks how can we **design these bio-sensors** to detect these molecules (which flow through pores)?

Stopped at 58:40
