Wed, Aug 24, 2022 at 4:57 PM

(Here's another couple for you! Thank-you for your great work!)

---

**From:** Cosgrove, Leslie <Leslie.Cosgrove@maine.gov>  
**Sent:** Saturday, August 20, 2022 1:20 PM  
**To:** [REDACTED]  
**Subject:** FOAA Request Response

[REDACTED]

As requested, attachments and this concise response (below) from our clinical section:

HETL uses the FDA EUA OPTI-SARS Covid-19 Real time PCR test and the Hologic Aptima SARS-CoV-2 assay for qualitative detection of SARS-CoV-2 RNA from human clinical specimens. Attached are the manufacturers' Instructions For Use documents.

Please let me know if there is something else you need, if I do not hear back from you within 30 days, the Department will consider this request as closed.

Thank you,

Leslie Cosgrove, Office Manager

Description of Record(s) Being Requested: All studies and/or reports, from anywhere in the world, describing the purification of the alleged "COVID-19 virus" (aka "SARS-COV-2", including any alleged "variants") directly from a sample taken from a diseased human, where the patient sample was not first combined with any other source of genetic material (i.e. monkey kidney cells aka Vero cells; fetal bovine serum). Please note that I am not requesting studies/reports where researchers failed to purify the suspected "virus" and instead cultured something, and/or performed an amplification test (i.e. PCR), and/or fabricated a "genome" from millions of sequences (allegedly) detected in an impure substance, and/or produced electron microscopy images of unpurified things. I request records that describe purification (separation of the alleged virus from everything else in the patient sample, as per standard laboratory practices for the purification of other very small things).

Date or Timeframe of the record(s) being requested: Since the advent of your agency.
