

Nano and Micro Graphene & Parasites Causing Blood Clots Seen in the Blood of the VAXXED & UNVAXXED!

**Robert O Young DSc, PhD

Dear Family and Friends,

Thank you for your love and support for over forty years. I am truly thankful, grateful, and humbled by your generosity and your prayers.

The following are just a few examples of the thousands of micrographs I have observed and documented in the last several months viewed under Brightfield, pHase Contrast and Darkfield Microscopy, Scanning Electron Microscopy[SEM] and Transmission Electron Microscopy[TEM].

What Does Healthy Blood Look Like?

1. Healthy capillary human blood from a UNVAXXinated male - appears even in color, even in shape and even in size as observed under Brightfield, pPhase Contrast and Darkfield microscopy.

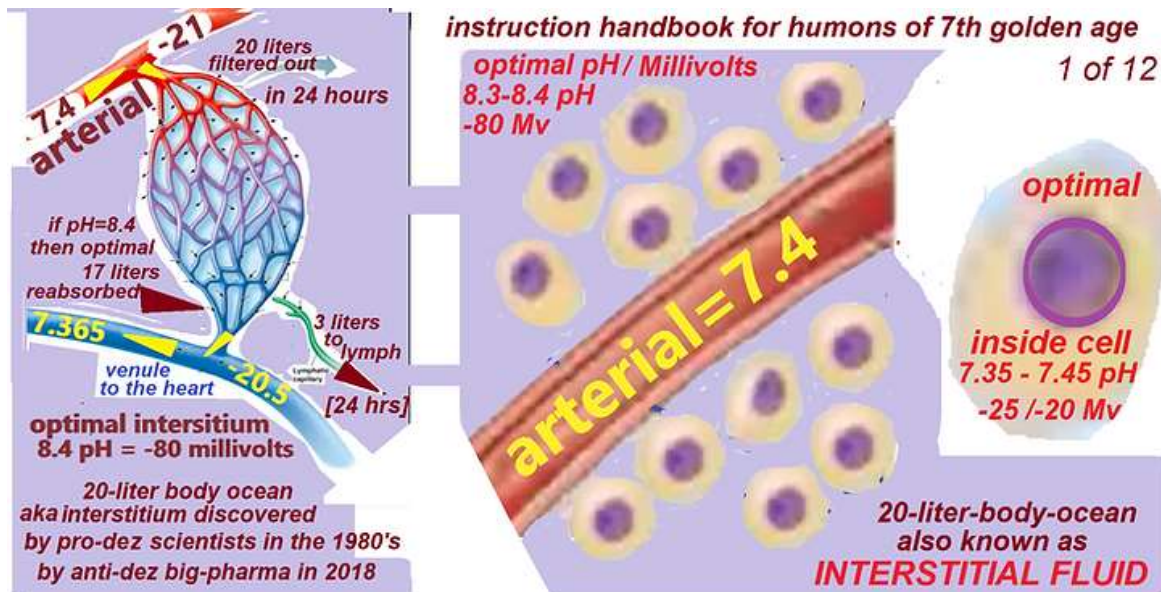

This is What Healthy Blood Looks Like! What Does YOUR Blood Look Like? Keep Reading!

What Does UnHealthy Blood Look Like Full of Graphene, Iron, Aluminum, Parasites, Acid Crystals and Blood Clots?

2. The micrograph below shows a symplasts or a micro clot of enlarged red blood cells or a blood clot observed using a compound pPhase contrast light microscope at 1500x magnification. These micro clots are now commonly seen in the live unstained blood of humans and animals due to acidic/toxic poison now found in food, water, air, vaccines, nutritional supplements and legend drugs. The hemoglobin, the molecule of the red blood cells adsorbs and absorbs

metabolic, dietary, respiratory and environmental acidic poisonous waste in order to protect the delicate pH balance of the vascular fluids at 7.365 pH and -20.5 mV and the interstitial fluids that surround all body cells at a 8.4 pH and -80 mV. The red blood cells NOT the white blood cells are the primary protectors of the body cells that make up all organs, glands and tissues. White blood cells are secondary to red blood cells in providing immunity which is a major oversight in current medical microbiology.

The symptoms of micro clots caused by acidic chemical and radiation poisoning are as follows:

Low energy

Cold hands

Cold feet

Itchy skin

Lightheadedness

Dizziness

Muddle thinking

Forgetfulness

Foggy thinking

Dry cough

Fever

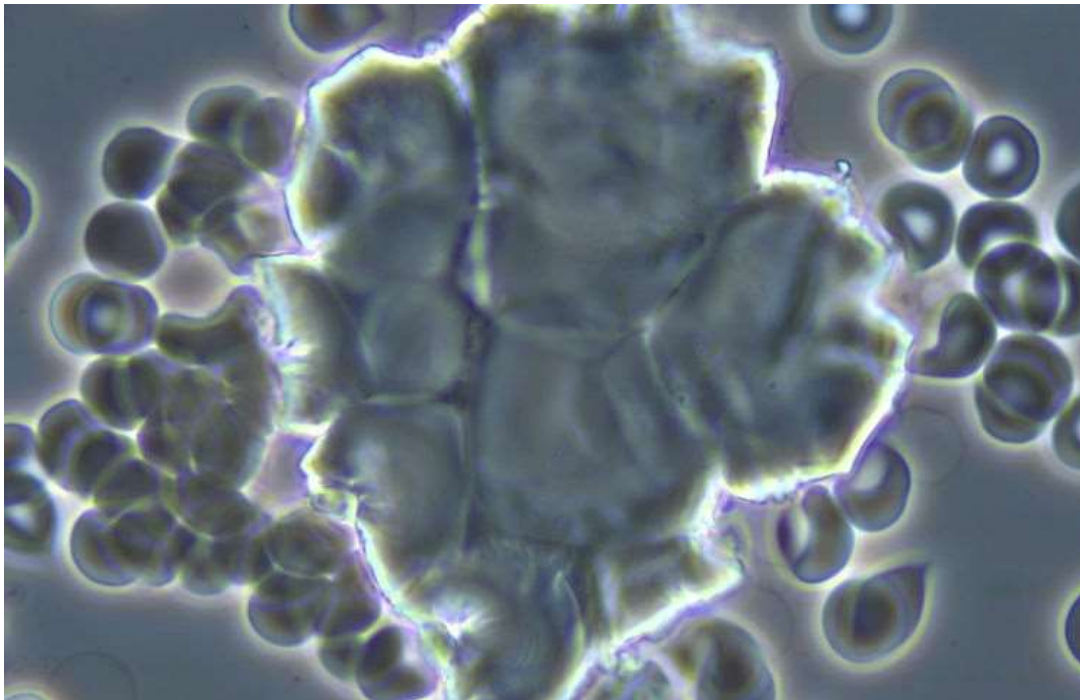

Hypoxia

Hypercapnia

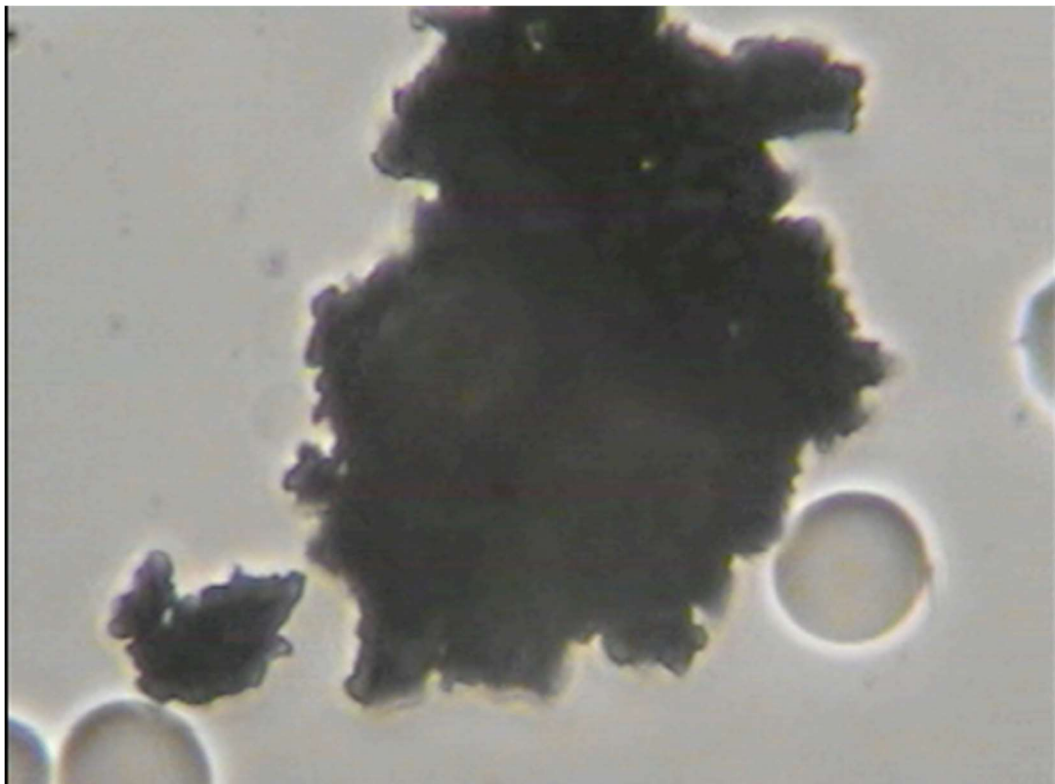

DIC or Pathological Blood Coagulation

Decompensated acidosis of the vascular and interstitial fluids

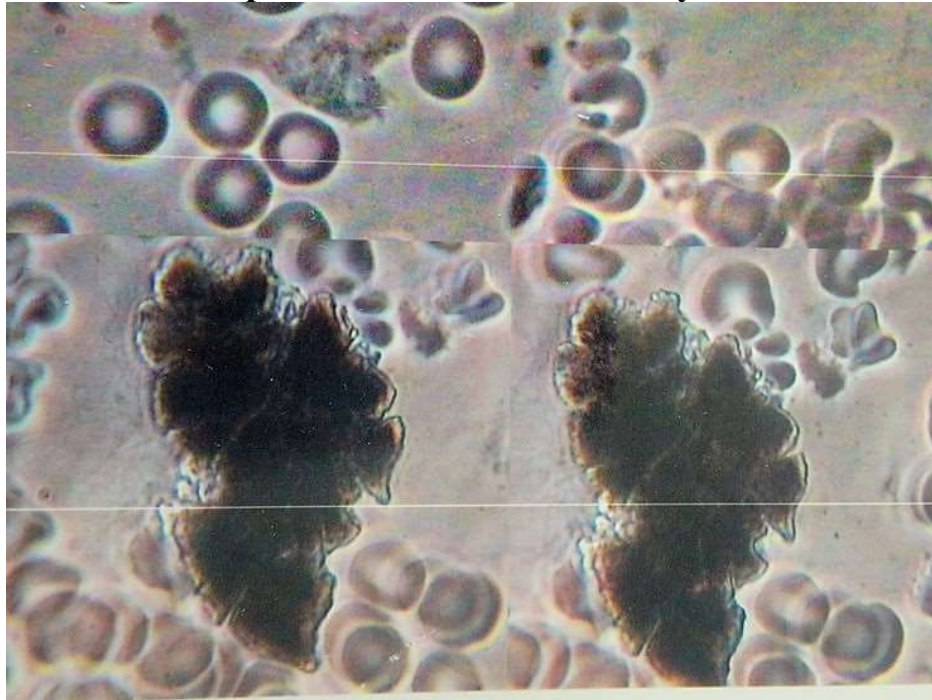

Death

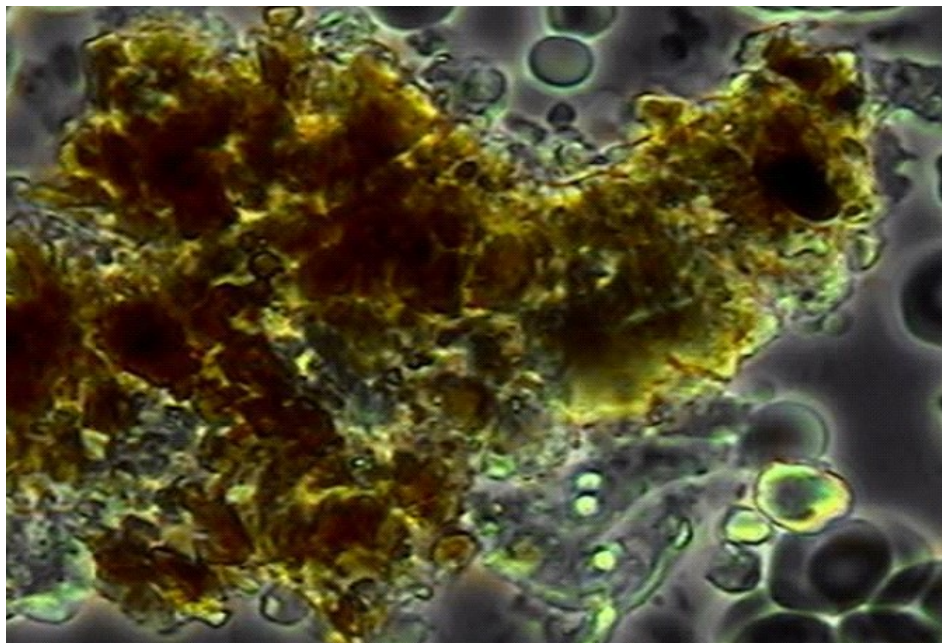

3. A large symplast of magnetic nano graphene oxide observed in the live unchanged and unstained capillary blood using pPhase Contrast Microscopy of a VAXXinated male.

4. Ferric oxide with lactic and sulphuric acid crystals observed in the live capillary blood from a VAXXinated male using Brightfield, phase contrast microscopy and confirmed with UV absorbance and Fluorescence Spectroscopy, Scanning Electron Microscopy, Transmission Electron Microscopy, Energy Dispersive Spectroscopy, X-ray Diffractometer and Nuclear Magnetic Resonance instruments.

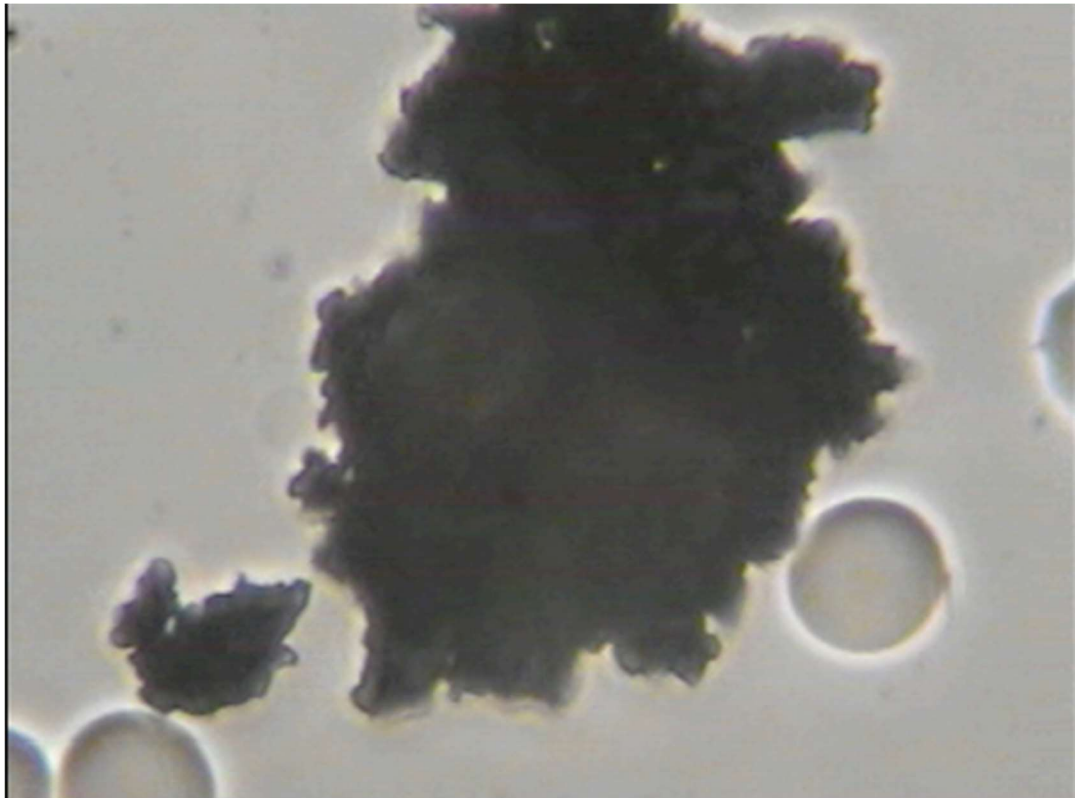

5. A large symplast of Nano Graphene oxide particulates observed in the live unchanged and unstained capillary blood of a VAXXinated female with metastatic lung and brain cancer patient after chemotherapy.

6. A large symplast of Nano Graphene Oxide observed in the live unchanged capillary blood under pPhase contrast microscopy of a UNVAXXinated female. I call these symplasts of graphene, " Graphene Atomic Bombs"

7. Graphene oxide in the center of what appears as a vulgaris bulgarus parasite at 1500x magnification observed in the live capillary blood under phase contrast microscopy in a VAXXinated female.

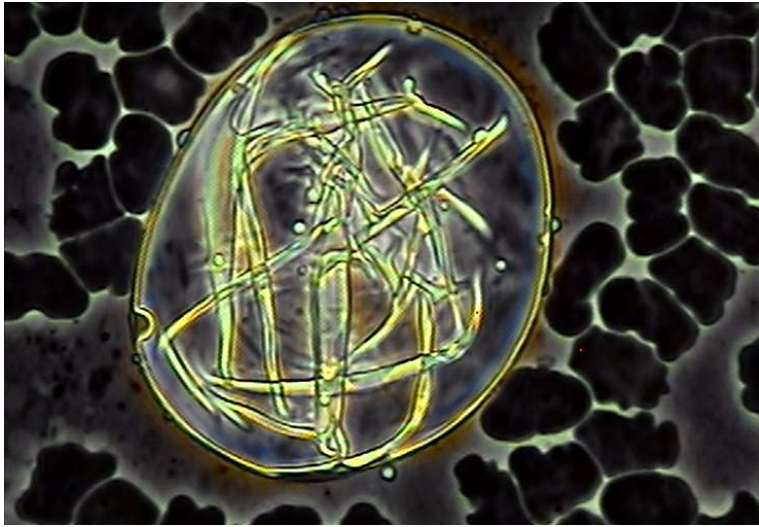

8. Pathological blood coagulation combined with a host of Wuchereria bancrofti, Microfilariae, Rope and Trypanosoma Cruzi blood parasites found in living capillary blood observed under pHase Contrast Microscopy. These parasites mainly live in the lymphatic vessels, but occasionally they are found in the living capillary blood and can thrive for up to ten years in animal and human blood. These parasites destroy the health of your interstitial and vadcular fluids, causing cellular and tissue acidification, inflammation and degeneration of the cell membranes and genetic matter leading to chronic disease! You pick up these parasites when eating sushi, chicken, beef, shrimp, pork and NOW through VAXXination! It is notable that shrimp, crab and lobster have a countless number of parasites that rot the body from the inside out! Flee from these highly acidic foods and inoculations and NEVER touch them with your hands!!

Detailed reporting (second half of video) of new findings of blood clots of different sizes, nano and micro, along with nanowires, apparent parasites, symplasts and jagged shards and coils of graphene in the live blood of vaccinated children and adults taken from capillaries (which means the nano graphene in the COVID vaccines has spread everywhere through the body) revealing that all who have taken the vaccine are in great danger of harm of different kinds including paralysis, strokes, heart attacks, sudden death, unless they wake up and start detoxing at speed.
